SOLO-FOUNDER GO-TO-MARKET REPORT

100 potential customers for an electric-land evidence company

Who to target, which gate to sell, the exact deliverable, cold-pilot probability range, founder cash and time, fee range, and whether the model is honestly viable.

RECOMMENDATION	**GO - but only as a productized evidence service. Do not buy land or promise power.**
FIRST PRODUCT	Five-day exact-parcel kill screen: $7.5k-$12k; 60% upfront; customer prepays experts and travel.
TARGET ORDER	Growth-stage powered-land developers -> regional operators/conversion platforms -> capital partners -> hyperscalers only through channel partners.
FOUNDER LIMIT	At most 3 concurrent projects, 2 new one-off assignments per month, and 8 recurring evidence accounts before hiring or pausing sales.

Prepared for Synchronicity | As of 29 August 2026 | United States prospect universe plus 10 foreign prospects

Important: probability ranges are planning priors for one paid pilot after customized cold outreach by an unknown solo founder. They are not statistical forecasts, investment advice, or assurances. Company names hyperlink to the public signal used. All power, engineering, environmental, legal and tax conclusions must be owned by qualified professionals.

Executive decision

What the research says before you spend meaningful capital

The service company is viable enough to test with $5,000 or less. The land-option/flip thesis is not presently financeable or solo-founder compatible. Your product is reduced uncertainty, not acreage near a line.

The best wedge is narrow and early.
Sell Gate 2 parcel kill screens, Gate 3 human validation, Gate 7 political monitoring and Gate 9 evidence passports. Do not sell grid-capacity conclusions, engineering, brokerage or a vague 'site selection' bundle.

One hundred simultaneous customers is impossible.
Even two hours per account per month would consume 2,400 hours per year. A disciplined solo cap is 2 new one-offs per month or 8 recurring accounts, with no more than 3 live projects.

Cold enterprise conversion is the weak link.
The row-level priors sum to about 1.8 paid pilots across this 100-name list and roughly $19k of first-pilot billings. That is an expectation, not a floor; zero wins is plausible.

The economics work only with upfront cash and pass-through experts.
Require 60% at signature, 40% on delivery, and 100% prepayment of title, counsel, travel, engineering and environmental work. Never fund a customer's diligence from your balance sheet.

Scenario	Modeled paid pilots	First-pilot billings	What must be true	Decision
Cold list only	~1.8 expected; 0 is plausible	~$19k expected	100 individually researched sequences; six touches; credible sample; no brand advantage.	**Too fragile alone**
Cold + 5 warm channels	3-6 planning range	$35k-$90k	Introductions from local counsel, engineers, utilities, land-use professionals or portfolio sponsors.	**Testable**
Reference-led year two	8-15 assignments	$100k-$250k	Two proof points, repeatable template, recurring evidence work and strict scope control.	**Viable micro-firm**
100 active customers	Operationally impossible	Not modeled	Would require staff, vendor management, software and institutional controls.	**Reject**

How to read the customer matrix

Definitions, assumptions and limitations

LANDING PROBABILITY	CAPITAL REQUIRED	CAPITAL RECEIVED
A range for the chance of one paid pilot within 12 months after a customized six-touch cold sequence by an unknown solo founder. The midpoint is used only to aggregate the list. Warm introductions, procurement registration, references and timing can move the outcome materially.	Founder execution cash per assignment, excluding founder labor and excluding third-party expert costs. With 60% upfront, net working capital should usually be zero or cash-positive. The table also shows founder hours because time, not cash, is the binding solo constraint.	The fixed service fee received by Synchronicity - not equity, financing, a land spread or transaction compensation. Sales tax, VAT, travel, title, counsel and engineering are outside the fee and prepaid by the client.

Probability bands

Range	Meaning	Interpretation
4%-8% / 3%-7%	Acute public problem + accessible growth-stage buyer	Still roughly a 92%-97% loss probability per name. Requires a project-specific insight, not a generic pitch.
2%-5% / 1%-3%	Good product fit; buyer may outsource narrow work	Core target band. One or two paid pilots can emerge from dozens of excellent sequences.
0.3%-2%	Institutional buyer, in-house team or timing uncertainty	Pursue only with a concrete trigger, partner introduction or uniquely useful evidence gap.
0.01%-0.2%	Hyperscaler/fund benchmark	Do not build the plan around direct wins. Reach through developers, capital sponsors and approved vendors.

Do not confuse a prospect's project size with your addressable contract. A $10B campus may still buy only a $10k-$20k evidence assignment - and may be harder to sell than a $100M regional project.

The gate strategy for a solo founder

Use the attached Electric Land Gate Strategy doctrine: founder owns the decision record; experts own expert conclusions

Gate	Question	Solo-founder position	Sell now?
0	What exactly is the project and what kills it?	Lead the requirement sprint. It prevents speculative search and makes every later comparison defensible.	**YES**
1	Which regions and utility territories deserve attention?	Use public evidence and call verification. State capacity as unknown unless a utility or expert supports it.	**YES**
2	Does the exact parcel survive fatal flaws?	Core product. Fast APN-level screen with explicit stop/proceed/escalate output.	**YES**
3	What will humans actually confirm?	Strong differentiator. Script calls, preserve names/dates/quotes, request written follow-up and record refusals.	**YES**
4	Can the site be controlled with diligence rights?	Coordinate only after local real-estate counsel. Avoid brokerage, wholesaling and percentage-of-transaction compensation.	**LIMITED**
5	Is there a credible power path by quantity, quality, price and date?	Founder organizes evidence and questions. A qualified power expert owns the conclusion. Customer prepays the expert.	**EXPERT**
6	Do physical, environmental and resource conditions work?	Founder orchestrates scopes and consolidates conclusions; licensed professionals own studies.	**EXPERT**
7	Will approvals and political support endure?	Excellent recurring product: agendas, dockets, commitments, moratoria, opposition and change alerts.	**YES**
8	Does the integrated business case survive challenge?	Sell an independent red-team based on evidence already gathered; do not give valuation, legal or engineering opinions.	**YES**
9	Can evidence transfer to tenant, lender, buyer and counsel?	Core moat and recurring service. Track source, author, date, expiry, evidence grade, owner and unresolved delta.	**YES**
10	Can construction and lifecycle obligations be managed?	Not a launch service. Revisit after a team, repeat customers and an expert bench exist.	**LATER**

Product catalog and undercut strategy

Undercut on scope, cycle time and fixed fee - not by pretending expert work is free

Product	Gate	Founder cash	Founder time	Fee received	What the client receives
Requirement and kill-criteria sprint	**0**	$0.25k-$0.75k	10-16h	**$3.5k-$5.5k**	One decision brief that fixes load, timing, land, water, fiber, political and capital kill criteria before a site search.
Market and utility-territory screen	**1**	$0.5k-$1.5k	18-28h	**$6.5k-$10k**	A short list of utility territories and counties with an evidence grade and explicit unknowns - never a claim of available MW.
Five-day exact-parcel kill screen	**2**	$0.75k-$2k	20-30h	**$7.5k-$12k**	APN, ownership, zoning, flood, access, water, fiber proxies, territory and fatal-flaw memo with a stop/proceed/escalate decision.
Utility and county truth sprint	**3**	$1.5k-$3.5k	25-40h	**$10k-$16k**	Prepare questions, conduct and log human calls, obtain written follow-ups where possible, and separate facts from refusals and unknowns.
Entitlement and political watch	**7**	$0.5k-$1.5k setup	8-15h + 2-4h/mo	**3-mo $4.5k-$9k**	Track dockets, agendas, moratoria, local narratives, conditions and commitments; issue a change memo and response checklist.
Independent IC red-team memo	**8**	$1.5k-$4k	30-45h	**$12k-$20k**	Challenge the integrated land-power-entitlement business case, rank fatal assumptions and define the next dollar of diligence.
Transferable evidence passport	**9**	$1k-$3k setup	20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**	Maintain source-linked facts, expert conclusions, approvals, commitments, expirations and unresolved deltas for buyer/lender/tenant diligence.

Competitor advantage	Your counter-position	Boundary
Software/data platforms: broad data and workflow	A dated human-verified decision record for one exact decision, delivered in five business days.	Do not claim proprietary capacity data you do not have.
Engineering firms: trusted professional conclusions	Kill weak sites before expensive scopes; package surviving questions for the engineer and preserve the answer.	Never sign or paraphrase an engineering conclusion as your own.
Brokerages: market access and transactions	Independent evidence and fatal-flaw screening with no incentive to close a land transaction.	No brokerage, wholesaling or success fee without state-specific counsel/licensing.
Large consultants: depth and institutional process	Fixed scope, senior-founder attention, transparent evidence grades and faster cycle time at a lower initial ticket.	Do not accept unlimited customization or enterprise indemnity you cannot insure.

Solo-founder economics and capital policy

Protect the balance sheet; make customer cash fund customer work

Stage	Maximum founder cash	Allowed spend	Stop condition
Before first paid pilot	**$2k-$5k total**	Entity/contracts review, basic E&O;/cyber quotes, secure storage, CRM, one sample report, limited records and local travel.	No $3k-plus customer deposit or two serious buyer interviews by the deadline you set.
After two paid pilots	**$6k-$15k annual operating budget**	Better data, expert review, insurance, travel and workflow tools - only from revenue.	Gross margin below 65%, late payment, scope creep, or fewer than two referrals from completed work.
Any individual assignment	**Use product table cap**	Founder execution cash only. All counsel, title, engineering, environmental and incremental travel are prepaid pass-through.	Client refuses 60% upfront or refuses to fund required experts.
Land control / options	**$0 now**	Do not use the service company's cash. Revisit only after customer demand, local counsel and parcel-specific evidence.	Any need to market an interest, promise assignability or rely on a future buyer to recover cash.
Reserve	**Keep at least $50k uncommitted**	Personal/company runway, taxes and unforeseen liabilities - not project speculation.	If reserve would fall below the floor, pause work or require full prepayment.

Capacity rule	Annual implication	Operating trigger
3 concurrent active projects	Prevents missed calls, stale evidence and silent scope creep.	If a fourth wants to start, charge a rush premium or schedule it later.
2 new one-offs per month	Roughly 18-24 assignments after holidays, sales and admin.	At a $10k average fee: practical solo ceiling near $180k-$240k before recurring work.
8 recurring evidence accounts	At 3 hours/month each, 288 delivery hours/year plus setup and one-offs.	At account 9, stop selling retainers or hire an analyst/contractor.
100 active accounts	Even 2 hours/month each = 2,400 hours/year, before sales, admin or projects.	Impossible for one founder. The list is a prospect universe, not a simultaneous service promise.

The binding capital is founder attention. If a service cannot be delivered from a checklist, evidence schema and defined decision output, it is not yet safe to sell solo.

U.S. customer matrix: Powered-land developer

25 prospects | Best direct fit: public siting activity, high evidence burden and more willingness to outsource narrow work. Company names link to the public research signal.

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
1	Tract	Jan 2026: new 1GW Chicago-area campus; Caldwell platform is near 3,000 acres and 4GW.	CDO / VP Development	9	Build the next secondary-market campus passport: parcel chain, territory, county statements, approvals, commitments and delta log before tenant diligence.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
2	PowerHouse Data Centers	Reports a broad North American development platform and active hyperscale expansion.	CDO / VP Development	9	Package one newly controlled campus into a buyer-ready evidence room with source dates, expiry dates and an unresolved-issue owner for every claim.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
3	Rowan Digital Infrastructure	Jan 2026: construction began on a 300MW Temple, Texas data center.	CEO/COO	9	Create a Temple-style evidence passport for the next campus, including public commitments, community conditions and handoff-ready decision records.	**2%-5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
4	CleanArc Data Centers	Public 2026 updates cite a 245MW Dallas site and a 900MW Virginia campus.	CEO/COO	9	Normalize the two-campus evidence set so tenant and capital teams can compare land, power-path, approvals and open risks on the same rubric.	**2%-5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
5	Corscale Data Centers	Active developer with multiple U.S. hyperscale campuses; live expansion fit is public, exact procurement need is not.	CEO/COO	9	Pilot on one campus: convert scattered site, utility and entitlement materials into a dated, transferable evidence passport.	**2%-5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
6	Crane Data Centers	Growth-stage hyperscale developer; public site materials show an active development platform.	CEO/COO	2	Run a five-day kill screen on the next parcel before option spend, with an APN-level fatal-flaw register and escalation budget.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
7	Ada Infrastructure	Virginia site materials describe 314 acres with a 200MW initial path and expansion potential.	CDO / VP Development	9	Assemble parcel, public-process and community evidence into a lender/tenant-ready passport while leaving power conclusions to retained engineers.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
8	Verrus	The proposed Salem, Oregon campus has faced visible entitlement and political friction.	CEO/COO	7	Track Salem agendas, conditions, stakeholder claims and company commitments; issue a weekly change memo and response checklist.	**3%-7%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
9	Edged U.S.	Expanding a water-efficient U.S. platform; Missouri opened with more than $143M of investment.	CDO / VP Development	7	Maintain a repeatable political-and-water evidence record for the next U.S. market, including every public claim and its supporting source.	**1%-3%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
10	Quantum Loophole	Gigawatt-scale Maryland campus positioning makes transferability of power, fiber and approvals central.	CDO / VP Development	9	Create a tenant-facing passport for a campus phase: source-linked fiber, approvals, utility correspondence, expirations and open dependencies.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
11	DC BLOX	Southeast-focused developer/operator with continuing regional expansion and large-campus ambitions.	CEO/COO	1	Screen three secondary Southeast territories against a customer-defined load/date before parcel work; disclose all capacity unknowns.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
12	Skybox Datacenters	Building a 600MW Austin-area campus and advancing Wichita Falls expansion.	CEO/COO	7	Monitor Wichita Falls and the next Texas jurisdiction for agendas, tax terms, community issues and commitments; maintain a response-ready evidence log.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
13	Chirisa Technology Parks	Reports more than 1GW under development and active brownfield/greenfield expansion.	CEO/COO	9	Turn one adaptive-reuse or greenfield project into a single tenant-ready passport, with legacy-site risks and expert conclusions clearly separated.	**3%-7%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
14	Takanock	Arizona projects combine onsite generation with visible political, aviation and environmental issues.	CEO/COO	7	Deliver a weekly Baccara/Tallmadge issue watch: hearings, Air Force/aviation, Superfund, water, noise and commitments, each with source and owner.	**4%-8%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
15	**Beale Infrastructure**	Active Kansas/Oklahoma projects follow a failed Tucson process that exposed community and water risk.	CEO/COO	**7**	Provide pre-hearing political durability monitoring for the next campus, including claim-to-evidence mapping and a commitment register.	**3%-7%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
16	**Related Digital**	Launched with a reported $45B pipeline and a 1GW-plus Michigan project.	CDO / VP Development	**9**	Independently normalize Michigan and the next campus into an executive evidence passport focused on unresolved dependencies, not marketing claims.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
17	**New Era Energy & Digital**	Markets an 8GW U.S. infrastructure pipeline, creating a large verification burden.	CEO/COO	**8**	Red-team one marketed campus: trace land, fuel, generation, approvals and schedule assumptions; recommend the single next diligence dollar.	**3%-7%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
18	**Creekstone Energy**	Delta Gigasite reports land, permits and an initial gas path for a 10GW-plus concept.	CEO/COO	**9**	Build an auditable claims register for Delta: executed items, expert conclusions, sponsor claims, expirations and remaining conditions.	**2%-5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
19	**O'Leary Digital**	Wonder Valley markets two campuses and 15GW across 26,000 acres, with projects still advancing approvals.	CDO / VP Development	**7**	Create separate Utah and Alberta political/permit watches and an evidence-grade comparison of sponsor claims versus official records.	**1%-3%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
20	**Nexus Data Centers**	Hubbard, Texas project emphasizes behind-the-meter power, water efficiency and in-house permitting.	CEO/COO	**7**	Maintain an independent permit, emissions, water, hearing and community-commitment tracker for the Hubbard campus.	**3%-7%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
21	**Fermi America**	11GW HyperGrid ambition now coexists with public execution and tenant-financing risk.	CDO / VP Development	**8**	Produce an independent IC red-team of the next phase: separate executed rights from sponsor claims and rank tenant, fuel, permit and capital conditions.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
22	**Energy Abundance Development Corp.**	Data City Texas is marketed as a 5GW, 50,000-acre behind-the-meter campus.	CEO/COO	**8**	Test the phase-one business case: parcel/control, fuel, permits, water, tenant sequence and evidence gaps, with explicit stop conditions.	**2%-5%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
23	**SB Energy**	Official materials show multiple 1GW-plus sites and a 10GW PORTS technology campus.	CDO / VP Development	**9**	Build a standardized evidence passport template for a new campus phase so OpenAI/tenant, lender and community diligence use one source of truth.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
24	**TECfusions**	Adaptive-reuse strategy includes a public 3GW Pennsylvania campus concept.	CEO/COO	**7**	Track legacy-site, municipal and community conditions for Pennsylvania while preserving a source-linked record of every adaptive-reuse claim.	**3%-7%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
25	**Lancium**	Active Texas portfolio includes announced 1GW-class Childress and Hall County campuses.	CDO / VP Development	**9**	Normalize one Clean Campus into a tenant-ready passport covering land/control, grid and onsite-power evidence, approvals, schedule and open deltas.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**

U.S. customer matrix: Data-center operator

38 prospects | Mixed fit: regional operators may buy narrow screens; global platforms have strong in-house teams and low cold access. Company names link to the public research signal.

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
26	QTS Data Centers	2026 Iowa campus announcement and continued U.S. megacampus expansion.	SVP Capacity / Site Selection	9	Offer an independent evidence QA layer on one new community: reconcile public commitments, property records and internal diligence before stakeholder handoff.	**0.1%-0.5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
27	Vantage Data Centers	Texas Frontier is presented as a $25B, 1.4GW mega-campus; Nevada also expanded.	SVP Capacity / Site Selection	9	Maintain a public-commitment and approval passport for one expansion market; surface contradictions before lender or community diligence.	**0.1%-0.5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
28	STACK Infrastructure	Recent U.S. announcements include New Mexico and a 220MW South Dallas campus.	SVP Capacity / Site Selection	9	Independently QA the next campus evidence room, focusing on expiry dates, responsible owners and unsupported power/permit assertions.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
29	Compass Datacenters	Public Mississippi plan carries a $10B investment figure and multi-phase execution.	SVP Capacity / Site Selection	7	Run a Mississippi public-process and commitment watch through approvals and site mobilization, with a weekly exception memo.	**0.3%-1%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
30	Stream Data Centers	Active San Antonio hyperscale build and public New York project materials.	SVP Capacity / Site Selection	2	Kill-screen the next expansion parcel before full consultant mobilization; hand off only expert questions that survive the screen.	**0.5%-2%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
31	DataBank	480MW South Dallas campus is financed and developing in phases.	SVP Capacity / Site Selection	9	Create a phase-by-phase evidence passport that links financing, approvals, public commitments and delivery dependencies.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
32	EdgeCore Digital Infrastructure	Gigascale strategy and a new Louisa County, Virginia campus create ongoing site-risk needs.	SVP Capacity / Site Selection	7	Monitor Louisa approvals, conditions and community commitments; maintain a source-linked record for internal and external handoffs.	**0.5%-2%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
33	Flexential	2026 plan includes a 110-acre Dallas-area campus and a fifth Atlanta-area facility.	SVP Capacity / Site Selection	2	Apply a fixed-scope parcel kill screen to the next secondary-market acquisition, then route surviving issues to local experts.	**0.5%-2%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
34	Prime Data Centers	Reports 5.6GW planned/operational and active Phoenix, Sacramento and European expansion.	SVP Capacity / Site Selection	1	Screen two U.S. secondary territories against a fixed customer profile; identify the best county to verify before parcel spend.	**1%-3%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
35	Novva Data Centers	Growth platform with continuing western U.S. expansion; exact current land mandate is unverified.	SVP Capacity / Site Selection	2	Offer an APN-level kill screen for the next Mountain West parcel, including water, entitlement and utility-territory truth labels.	**1%-3%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
36	T5 Data Centers	Announced 480MW Chicago-suburb and 300MW Atlanta campus plans.	SVP Capacity / Site Selection	7	Monitor one entitlement track and convert hearing records, conditions and public promises into a durable change log.	**1%-3%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
37	Sabey Data Centers	Active Ashburn and Pacific Northwest capacity expansion.	SVP Capacity / Site Selection	2	Run a five-day expansion-parcel screen near an existing campus to expose title, access, entitlement and resource conflicts early.	**0.5%-2%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
38	Aligned Data Centers	Large multi-market platform; no specific live land procurement mandate was verified.	SVP Capacity / Site Selection	9	Pilot evidence-room QA on one development: identify stale, duplicated or unsupported claims and assign remediation owners.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
39	CyrusOne	Global hyperscale operator; live U.S. land need was not publicly verified for this report.	SVP Capacity / Site Selection	9	Offer a narrow external QA pass on one site passport, not core site selection: source dates, conditions, conflicts and handoff gaps.	**0.1%-0.5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
40	**Digital Realty**	Very large global platform with mature in-house teams; prospective only as overflow evidence QA.	SVP Capacity / Site Selection	9	Sell a tightly bounded audit of one secondary-market evidence pack; do not pitch broad site selection.	**0.05%-0.2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
41	**Equinix**	Global interconnection platform and 2026 atNorth transaction; mature procurement makes cold access difficult.	SVP Capacity / Site Selection	8	Offer independent red-team support only for a non-core expansion or acquired-site evidence gap.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
42	**NTT Global Data Centers Americas**	Global platform with deep internal technical and real-estate capacity; no live mandate verified.	SVP Capacity / Site Selection	9	Pitch a source-control cleanup on one inherited or secondary-market project, not a substitute for NTT engineering.	**0.05%-0.2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
43	**Iron Mountain Data Centers**	Multi-market expansion platform; likely to buy narrow overflow work rather than basic site selection.	SVP Capacity / Site Selection	9	Audit one development evidence pack for missing source dates, expiring documents and inconsistent public commitments.	**0.1%-0.5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
44	**CoreSite**	Interconnection-focused U.S. platform with continuing campus investment.	SVP Capacity / Site Selection	2	Kill-screen an adjacent expansion parcel around title, access, zoning and utility territory before full engineering.	**0.3%-1%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
45	**CloudHQ**	Hyperscale developer/operator with multiple U.S. campuses; exact new-market need is not public.	SVP Capacity / Site Selection	9	Provide external evidence QA for one new-market package, emphasizing conditions, expirations and unsupported schedule claims.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
46	**Cologix**	North American interconnection platform backed for continued footprint growth.	SVP Capacity / Site Selection	1	Screen secondary metro utility territories for a small interconnection-led expansion before a parcel search begins.	**0.3%-1%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
47	**Switch**	Large campus operator with mature site-development capability; cold outsider access is unlikely.	SVP Capacity / Site Selection	8	Offer a one-off independent red-team only where a board or capital partner wants an external challenge record.	**0.3%-1%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
48	**Centersquare**	Large U.S. colocation footprint; potential need is brownfield/edge expansion rather than greenfield megacampus work.	SVP Capacity / Site Selection	1	Rank three edge metros by utility territory, permitting friction and existing-network fit; verify only the winner.	**0.5%-2%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
49	**EdgeConneX**	Global edge-to-hyperscale platform with internal expertise; overflow work is the plausible wedge.	SVP Capacity / Site Selection	2	Deliver a fixed five-day fatal-flaw screen on a non-core U.S. parcel, with no claim of power availability.	**0.3%-1%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
50	**Yondr Group**	Hyperscale operator with U.S. market exposure; current land procurement need was not verified.	SVP Capacity / Site Selection	9	Audit a prospective U.S. site's evidence chain for transferability before tenant or lender review.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
51	**Serverfarm**	Adaptive-reuse and data-center operations platform; brownfield truth is the best wedge.	SVP Capacity / Site Selection	2	Screen a conversion asset for title, zoning, access, legacy environmental records and utility territory; escalate technical work.	**0.5%-2%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
52	**TierPoint**	2026 financing and Pennsylvania campus acquisition create integration and expansion work.	SVP Capacity / Site Selection	9	Create an acquisition-to-operations evidence passport for the Pennsylvania campus, including missing documents and expiry owners.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
53	**US Signal**	2026 Aurora acquisition and expansion are concrete, current triggers.	COO / VP Development	2	Kill-screen the next adjacent/secondary parcel and produce an expert escalation map before expansion capital is committed.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
54	**365 Data Centers**	Aphorio Carter partnership targets a 200MW AI-ready pipeline.	COO / VP Development	1	Screen three target markets and hand back one county/territory to verify, with sources and explicit capacity unknowns.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
55	**Element Critical**	Added 10MW in Houston and launched a newly backed platform for growth.	COO / VP Development	**2**	Offer the growth team a five-day brownfield/adjacent-parcel screen with a decisive stop/proceed/escalate memo.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
56	**H5 Data Centers**	Regional platform with a public expansion/news cadence; exact land mandate is not verified.	SVP Capacity / Site Selection	**1**	Rank two secondary U.S. metros for the next edge expansion, then validate the winning county by calls and written follow-up.	**1%-3%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
57	**phoenixNAP**	Phoenix asset transaction/expansion activity creates a clear diligence and handoff event.	SVP Capacity / Site Selection	**9**	Build a transaction evidence passport that separates retained operating obligations from buyer expansion assumptions.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
58	**Evocative**	Regional colocation platform; likely fit is disciplined secondary-market screening.	COO / VP Development	**1**	Deliver a two-market screen tied to existing customer/network demand, not a speculative national map.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
59	**LightEdge**	Regional operator with a smaller procurement surface than hyperscalers; no live land need verified.	COO / VP Development	**2**	Offer CEO/COO a fixed-fee kill screen on the next expansion asset, with a five-day deadline and hard exclusions.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
60	**Data Canopy**	Small colocation/cloud operator discussing secondary markets; may need market evidence, not megacampus work.	COO / VP Development	**1**	Test two secondary metros against actual customer/network requirements and identify one county for human verification.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
61	**DartPoints**	Edge-focused regional platform makes repeatable county-level screens more relevant than national site search.	COO / VP Development	**1**	Create a repeatable edge-market screen using utility territory, fiber, zoning and customer demand; verify only the top market.	**2%-5%** cold, 12 mo.	$0.5k-$1.5k 18-28h	**$6.5k-$10k**
62	**ColoHouse**	Regional colocation platform; plausible buyer for narrow expansion diligence but no current mandate verified.	COO / VP Development	**2**	Run a five-day fatal-flaw screen on the next acquisition or expansion parcel and provide an expert handoff checklist.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**
63	**RadiusDC**	2026 Phoenix transaction plus Indianapolis/Nashville growth creates active expansion events.	COO / VP Development	**2**	Kill-screen the next edge campus or adjacent parcel; preserve property, entitlement and utility evidence for the investment memo.	**2%-5%** cold, 12 mo.	$0.75k-$2k 20-30h	**$7.5k-$12k**

U.S. customer matrix: AI/HPC infrastructure buyer

27 prospects | Best approached with a requirement/red-team offer; many are tenants, not land developers. Conversion platforms are more accessible. Company names link to the public research signal.

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
64	**CoreWeave**	Large and expanding AI infrastructure footprint; Pennsylvania commitment and 40-plus facilities are public.	VP Infrastructure / Real Estate	**8**	Red-team one sponsor-proposed campus before CoreWeave signs: test land/control, date-to-power evidence, approvals and dependency ownership.	**0.3%-1%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
65	**Crusoe**	2026 announcements include a 900MW Abilene build and 1GW Childress campus.	VP Infrastructure / Real Estate	**8**	Independently challenge the next powered-site package and produce a decision memo that cleanly separates utility facts from sponsor claims.	**0.5%-2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
66	**Lambda**	Raised large infrastructure financing and assembled leadership for gigawatt-scale expansion.	VP Infrastructure / Real Estate	**0**	Translate GPU, cooling, network, delivery-date and capital needs into a signed site kill-criteria brief before taking broker/developer calls.	**0.5%-2%** cold, 12 mo.	$0.25k-$0.75k 10-16h	**$3.5k-$5.5k**
67	**Vultr**	Global cloud platform across 36 regions; a new owned/leased region must start with precise requirements.	VP Infrastructure / Real Estate	**0**	Create a region requirement and kill-criteria brief that distinguishes latency/sovereignty needs from land and power preferences.	**0.5%-2%** cold, 12 mo.	$0.25k-$0.75k 10-16h	**$3.5k-$5.5k**
68	**Fluidstack**	AI cloud provider signing large capacity partnerships; exact U.S. self-development mandate is not public.	VP Infrastructure / Real Estate	**0**	Define a replicable capacity requirement packet so developers bid against the same load, schedule, cooling and risk assumptions.	**0.5%-2%** cold, 12 mo.	$0.25k-$0.75k 10-16h	**$3.5k-$5.5k**
69	**Applied Digital**	Public 210MW lease and additional campus development create a repeatable powered-site pipeline.	VP Infrastructure / Real Estate	**9**	Build a lender/tenant evidence passport for the next phase and maintain every power, permit and schedule condition to close.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
70	**IREN**	FY2026 materials cite a development pipeline above 5GW.	VP Infrastructure / Real Estate	**8**	Red-team one pipeline site: title/control, grid/onsite-power evidence, approvals, conversion capex assumptions and fatal dependencies.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
71	**Hut 8**	Pipeline reported at 8.66GW, including a 352MW first phase of Beacon Point.	VP Infrastructure / Real Estate	**9**	Create a phase-level evidence passport that a tenant and capital partner can diligence without rebuilding the file.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
72	**Cipher Mining**	SEC filing describes a multi-site, multi-gigawatt development portfolio.	VP Infrastructure / Real Estate	**8**	Independently rank the next three conversion/development sites by evidence quality and next-dollar diligence value.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
73	**TeraWulf**	Acquired a 1GW Kentucky HPC campus and continues AI/HPC conversion activity.	VP Infrastructure / Real Estate	**9**	Build a Kentucky acquisition evidence passport and track which power, land, permit and tenant conditions survive the transaction.	**1%-3%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
74	**CleanSpark**	Acquired 600MW near Houston and signed a long-term Georgia data-center lease.	VP Infrastructure / Real Estate	**8**	Red-team the next mining-to-AI site conversion; route cooling/electrical conclusions to experts and own the integrated decision record.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
75	**MARA Holdings**	Starwood partnership and Long Ridge energy acquisition support an AI-capable infrastructure strategy.	VP Infrastructure / Real Estate	**8**	Compare conversion candidates on evidence-grade land, fuel, entitlement, cooling and customer-date assumptions; state fatal unknowns.	**0.5%-2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
76	**Bitdeer**	Large global power/data-center portfolio and continuing development updates.	VP Infrastructure / Real Estate	**8**	Red-team one U.S. expansion or conversion site and create the expert escalation sequence before committing conversion capital.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
77	**Riot Platforms**	Corsicana AI/HPC evaluation and a first Rockdale data-center lease show conversion intent.	VP Infrastructure / Real Estate	**8**	Create an independent Corsicana/Rockdale conversion decision memo: evidence, fatal assumptions, expert work and staged spend gates.	**1%-3%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
78	**Galaxy Digital**	Helios is a major AI/HPC campus backed by project financing.	VP Infrastructure / Real Estate	**9**	Maintain a financing-to-delivery evidence passport for a new phase, including tenant conditions and source-dated power/permit records.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
79	**Core Scientific**	Large U.S. powered footprint shifting toward AI/HPC hosting; exact new-site mandate is not public.	VP Infrastructure / Real Estate	**8**	Red-team one expansion/conversion proposal and supply an IC-ready evidence delta list, not engineering conclusions.	**0.5%-2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
80	**Soluna Holdings**	Active renewable-compute project pipeline includes the 350MW Kati concept.	VP Infrastructure / Real Estate	**8**	Test the next project against land, generation, interconnection, permits, curtailment economics and customer timing; rank stop conditions.	**2%-5%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
81	**Bitfarms**	Public plan to convert a Washington site to HPC/AI with T5 support.	VP Infrastructure / Real Estate	**8**	Own the integrated conversion decision record: property, power, cooling-expert scope, entitlement, capex assumptions and staged go/no-go gates.	**2%-5%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
82	**Nscale**	U.S. West Virginia AI-factory campus now sits inside a global, gigawatt-scale pipeline.	VP Infrastructure / Real Estate	**9**	Create a U.S. campus evidence passport that separates acquired rights, developer claims, customer commitments and remaining approvals.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo	**$10k-$16k + $1k-$2.5k/mo**
83	**OpenAI**	Stargate uses multiple development partners and sites; direct cold-vendor access is exceptionally unlikely.	VP Infrastructure / Real Estate	**8**	Pitch only through a developer/capital partner: a narrow independent red-team of one proposed site before final capacity commitment.	**0.01%-0.05%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
84	**xAI**	Colossus-scale infrastructure creates recurring siting pressure, but procurement is concentrated and relationship-driven.	VP Infrastructure / Real Estate	**0**	Offer a requirement packet only through a warm infrastructure partner; do not cold-pitch generic land leads.	**0.05%-0.2%** cold, 12 mo.	$0.25k-$0.75k 10-16h	**$3.5k-$5.5k**
85	**Microsoft**	Global data-center build program with mature internal teams and formal procurement.	VP Infrastructure / Real Estate	**8**	Reach only via an approved developer or investor: provide a project-specific external challenge record on a secondary-market site.	**0.01%-0.05%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
86	**Amazon Web Services**	Massive global infrastructure footprint; direct solo-founder site-selection sale is near-zero probability.	VP Infrastructure / Real Estate	**8**	Serve indirectly through a campus developer: independent evidence QA against AWS-specific requirements under NDA.	**0.01%-0.05%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
87	**Google**	Global owned/leased data-center platform with deep in-house expertise.	VP Infrastructure / Real Estate	**8**	Do not pitch land. Seek a subcontracted, project-specific public-record and evidence-QA scope through an existing developer.	**0.01%-0.05%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
88	**Meta**	Large self-build program with experienced teams; a direct cold sale is not a realistic base-case channel.	VP Infrastructure / Real Estate	**7**	Serve only through a development partner on public-process monitoring and commitment tracking for one named jurisdiction.	**0.01%-0.05%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo	**3-mo $4.5k-$9k**
89	**Oracle**	Stargate and cloud-region growth create demand, but procurement and technical diligence are institutional.	VP Infrastructure / Real Estate	**8**	Offer through an infrastructure partner: one independent site red-team with an auditable claim/evidence matrix.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
90	**Anthropic**	Aug 2026 partnership with Macquarie and GIC will identify and develop dedicated U.S. sites.	VP Infrastructure / Real Estate	**0**	Approach Theseus/Macquarie, not Anthropic cold: convert model and delivery needs into a repeatable site requirement and kill-criteria packet.	**0.05%-0.2%** cold, 12 mo.	$0.25k-$0.75k 10-16h	**$3.5k-$5.5k**

U.S. customer matrix: Capital sponsor

10 prospects | Channel and IC customers. High value, extremely low cold probability. Avoid contingency compensation. Company names link to the public research signal.

#	Prospect	Public signal	Buyer	Gate	Exact solo-founder offer	P(paid pilot)	Founder cash / time	Fee received
91	**Blackstone**	QTS ownership and a large digital-infrastructure program create repeated IC decisions.	MD / Principal, Digital Infrastructure	**8**	Sell a conflicted-claim red-team on one sponsor-originated secondary-market site; price as avoided bad-diligence spend, not transaction success.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
92	**Brookfield Asset Management**	Launched a $100B AI infrastructure program and is funding large data-center portfolios.	MD / Principal, Digital Infrastructure	**8**	Offer a narrow U.S. site evidence audit to the deal team through a warm operator/developer introduction.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
93	**Blue Owl Capital**	Active data-center equity/debt sponsor and development partner, including PowerHouse/Chirisa.	MD / Principal, Digital Infrastructure	**8**	Red-team one developer-supplied site packet before IC: evidence grade, missing proof, dependency owner and next-dollar diligence.	**0.1%-0.5%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
94	**DigitalBridge**	Dedicated digital-infrastructure manager with Vantage and other data-center exposure.	MD / Principal, Digital Infrastructure	**8**	Provide an external QA memo for a non-core acquisition/development site where management wants an auditable challenge file.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
95	**KKR**	Publishes a data-center investment thesis and backs digital infrastructure globally.	MD / Principal, Digital Infrastructure	**8**	Approach through a portfolio company: fixed-scope red-team of land-power-entitlement evidence before IC escalation.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
96	**Stonepeak**	Owns/backs multiple data-center platforms and launched Montera for North American expansion.	MD / Principal, Digital Infrastructure	**8**	Audit one platform-originated site package for evidence transferability and missing professional conclusions.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
97	**Goldman Sachs Alternatives**	QScale portfolio ownership provides a concrete AI-data-center investment channel.	MD / Principal, Digital Infrastructure	**8**	Offer through QScale or another portfolio company: independent project evidence QA for a new site or phase.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
98	**Macquarie Asset Management**	Aug 2026 Anthropic/GIC partnership will identify dedicated U.S. development sites.	MD / Principal, Digital Infrastructure	**8**	Pitch Theseus infrastructure team an independent early-site red-team and maintain the decision record through sponsor handoff.	**0.1%-0.5%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
99	**Silver Lake**	Current Vantage and Khazna investments show deep data-center exposure.	MD / Principal, Digital Infrastructure	**8**	Seek portfolio-company sponsorship for a fixed independent challenge memo; avoid a generic fund-level sales pitch.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**
100	**Starwood Capital Group**	Real-estate investor with data-center experience and an AI infrastructure partnership with MARA.	MD / Principal, Digital Infrastructure	**8**	Offer a pre-IC evidence audit of one power-rich real-estate conversion, excluding valuation and engineering opinions.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h	**$12k-$20k**

Who to contact first

A practical first 20, selected for problem urgency, access and solo-fit - not simply project size

Order	Company	First line of outreach	Ask
1	Takanock	I mapped the public issues around Baccara into a weekly evidence schema; the deliverable is designed to catch a hearing or aviation condition before it becomes schedule risk.	20-minute fit call; then entitlement and political watch at 3-mo $4.5k-$9k.
2	Chirisa Technology Parks	Your multi-state mix of brownfield and greenfield assets is exactly where a standardized evidence passport prevents each project from rebuilding diligence.	20-minute fit call; then transferable evidence passport at $10k-$16k + $1k-$2.5k/mo.
3	Beale Infrastructure	I built a pre-hearing commitment tracker from the Tucson lessons that can be applied to De Soto/Tulsa without asking your team to change its workflow.	20-minute fit call; then entitlement and political watch at 3-mo $4.5k-$9k.
4	Nexus Data Centers	Your Hubbard messaging makes permit, water and emissions traceability central; I can maintain the independent source log behind those claims.	20-minute fit call; then entitlement and political watch at 3-mo $4.5k-$9k.
5	TECfusions	Adaptive reuse moves fast but legacy facts are fragmented; I can turn the Pennsylvania public record into a weekly exception memo.	20-minute fit call; then entitlement and political watch at 3-mo $4.5k-$9k.
6	New Era Energy & Digital	An 8GW pipeline creates a claims-control problem; I can red-team one campus and identify the single next diligence dollar.	20-minute fit call; then independent ic red-team memo at $12k-$20k.
7	Skybox Datacenters	I can maintain the Wichita Falls approval/commitment log and hand your team only changes that affect schedule, economics or tenant diligence.	20-minute fit call; then entitlement and political watch at 3-mo $4.5k-$9k.
8	Creekstone Energy	Delta publishes unusually specific milestones; I can turn them into an auditable executed-versus-conditional evidence register for counterparties.	20-minute fit call; then transferable evidence passport at $10k-$16k + $1k-$2.5k/mo.
9	Energy Abundance Development Corp.	For a 50,000-acre concept, phase-one proof matters more than a giant map; I can isolate the few claims an IC must validate next.	20-minute fit call; then independent ic red-team memo at $12k-$20k.
10	Rowan Digital Infrastructure	I can package the next Temple-style campus into a dated, transferrable evidence passport before tenant diligence begins.	20-minute fit call; then transferable evidence passport at $10k-$16k + $1k-$2.5k/mo.

Who to contact first - continued

Orders 11-20; keep this second wave queued until the first wave has completed two touches

Order	Company	First line of outreach	Ask
11	CleanArc Data Centers	I can normalize Dallas and Virginia onto one evidence rubric so internal, tenant and capital teams compare the same facts.	20-minute fit call; then transferable evidence passport at $10k-$16k + $1k-$2.5k/mo.
12	Corscale Data Centers	I can pilot a one-campus evidence cleanup that assigns an owner and expiry date to every critical document.	20-minute fit call; then transferable evidence passport at $10k-$16k + $1k-$2.5k/mo.
13	US Signal	The Aurora acquisition is a natural trigger for a fixed five-day adjacent-parcel and handoff screen.	20-minute fit call; then five-day exact-parcel kill screen at $7.5k-$12k.
14	365 Data Centers	The 200MW pipeline needs a disciplined market shortlist; I can narrow three markets to one county before parcel cost begins.	20-minute fit call; then market and utility-territory screen at $6.5k-$10k.
15	Element Critical	Your newly backed platform can use a fixed-fee fatal-flaw screen before growth capital reaches full consultant scope.	20-minute fit call; then five-day exact-parcel kill screen at $7.5k-$12k.
16	RadiusDC	Phoenix/Indianapolis/Nashville expansion makes a repeatable edge-campus screen immediately useful.	20-minute fit call; then five-day exact-parcel kill screen at $7.5k-$12k.
17	Soluna Holdings	I can rank the next project by evidence quality and identify which interconnection/generation assumptions need expert work first.	20-minute fit call; then independent ic red-team memo at $12k-$20k.
18	Bitfarms	I can own the Washington conversion decision record while T5 and engineers own the technical conclusions.	20-minute fit call; then independent ic red-team memo at $12k-$20k.
19	Prime Data Centers	I can screen two U.S. secondary territories against a signed requirement before the next land search widens.	20-minute fit call; then market and utility-territory screen at $6.5k-$10k.
20	Novva Data Centers	A Mountain West parcel screen can expose water, entitlement and territory errors before a broad consultant team mobilizes.	20-minute fit call; then five-day exact-parcel kill screen at $7.5k-$12k.

A sales process one founder can execute

The sequence is evidence-first and stops before free consulting

Touch	Timing	Action	What not to do
1	Day 0	Send a 120-word note tied to one named project and one evidence gap. Include a one-page anonymized sample, not a deck.	Do not attach a generic national map or claim available power.
2	Day 3	Send one public-record fact they may have missed and explain the decision it could change.	Do not give the full analysis away.
3	Day 8	Offer the fixed scope, fee, five-day cycle and explicit exclusions. Ask for a 20-minute fit call.	Do not offer an open-ended free discovery project.
4	Day 15	Route through a likely introducer: land-use counsel, power engineer, economic developer or capital partner.	Do not ask an introducer to endorse power or legal conclusions.
5	Day 30	Send a relevant public-process change or a two-sentence kill criterion; close the loop.	Do not chase indefinitely.
6	Day 60-90	Re-open only on a concrete trigger: land filing, permit, financing, leadership hire, hearing, acquisition or new campus.	Do not automate generic monthly spam.

Recommended first offer language

We find the reason not to spend the next $100,000. In five business days, Synchronicity delivers an exact-parcel decision record covering APN/ownership, zoning, flood, access, utility territory, water and fiber proxies, public approvals and unresolved questions. The output is stop, proceed or escalate - with every statement linked to a source. Fixed fee: $9,500; 60% at signature; expert work and travel prepaid separately.

Contract terms that preserve the model

- Fixed deliverable, named parcel/market, five-day clock after complete inputs, and one 30-minute readout.
- 60% non-refundable kickoff payment; 40% due on delivery; late fees and pause rights.
- Client owns decisions; report is not engineering, utility commitment, legal, environmental, title or investment advice.
- External experts contract directly with client where possible; otherwise client prepays 100% and accepts their terms.
- No success fee, land spread, brokerage representation, option marketing or percentage of financing without local counsel and any required license.
- Mutual confidentiality; no hyperscaler or tenant name in marketing without written permission; secure evidence room and deletion schedule.

Foreign prospect analysis

Ten non-U.S. prospects; start with remote evidence work and a local partner, not land control

Prospect	Country	Public signal	Gate	Exact offer	P(paid pilot)	Founder cash/time	Fee received
eStruxture Data Centers	**Canada**	C$1.35B financing to expand AI-ready facilities across Canada.	**1**	Screen one non-core Canadian metro, then validate the winning utility/municipality with a local partner; deliver in English and French where Quebec-facing.	**0.5%-2%** cold, 12 mo.	$0.5k-$1.5k 18-28h travel prepaid	**$6.5k-$10k**
QScale	**Canada**	2026 construction on a C$700M, 60MW second building at Q01.	**9**	Create a bilingual, phase-level evidence passport for a future Quebec site, with Hydro-Quebec and municipal statements clearly attributed.	**0.5%-2%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
Urbacon Data Centre Solutions	**Canada**	C$320M financing for DC4-DC6 at Barker Business Park near Toronto.	**9**	Build an acquisition/financing evidence passport for the next phase and identify every document or approval that cannot transfer cleanly.	**2%-5%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
Kao Data	**United Kingdom**	UK HPC/AI operator with Harlow, Slough, Northolt and Manchester expansion.	**7**	Monitor one planning authority, conditions, local objections and commitments; pair with UK planning counsel for conclusions.	**0.5%-2%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo travel prepaid	**3-mo $4.5k-$9k**
Ark Data Centres	**United Kingdom**	Active UK campus platform and continuing expansion.	**9**	Audit one campus evidence room for planning-condition traceability and public-commitment consistency; no UK legal opinions.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
VIRTUS Data Centres	**United Kingdom**	June 2026 LONDON19 expansion plus European campus growth.	**9**	Build a planning-and-delivery evidence passport for a UK expansion phase, with VAT/travel and local professional costs prepaid.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
atNorth	**Norway**	2026 land acquisition for a planned 350MW first Norwegian campus.	**7**	Track Haugaland municipal/grid records and community commitments with a Norwegian researcher; deliver the source-linked change log in English.	**0.3%-1%** cold, 12 mo.	$0.5k-$1.5k setup 8-15h + 2-4h/mo travel prepaid	**3-mo $4.5k-$9k**
Green Mountain	**Norway**	Established Norwegian platform with Nordic and UK expansion.	**9**	Audit one expansion evidence pack for source dates, permit conditions, power documentation and heat-reuse commitments.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
Bulk Infrastructure	**Norway**	EUR410M financing for N01 campus expansion and active 2026 power contracting.	**9**	Create a lender/tenant evidence passport for the next N01 phase, using a local partner for Norwegian-language records.	**0.3%-1%** cold, 12 mo.	$1k-$3k setup 20-35h + 2-4h/mo travel prepaid	**$10k-$16k + $1k-$2.5k/mo**
Khazna Data Centers	**United Arab Emirates**	$2.62B financing and rapid UAE/international expansion.	**8**	Only through a local advisor or portfolio sponsor: independent evidence red-team on an international site, with UAE counsel and export-control review.	**0.05%-0.2%** cold, 12 mo.	$1.5k-$4k 30-45h travel prepaid	**$12k-$20k**

Country difficulty is evaluated for parcel/site evidence work performed in-market, not merely a U.S.-based desk memo.

Foreign-country difficulty

Operational judgment only; obtain country-specific legal and tax advice before accepting work

Country	Difficulty	Why	Safe entry model	Go / no-go
Canada	**2 / 5 - Moderate**	Familiar commercial environment and English access, but GST/HST, provincial law, Quebec language/procurement and local utility/municipal relationships matter. CRA says non-residents carrying on business in Canada may need normal GST/HST registration.	Remote Gate 0-2 work; Canadian land-use counsel/engineer; local caller; bilingual delivery for Quebec; no Canadian land control.	**FIRST FOREIGN MARKET**
United Kingdom	**3 / 5 - Moderate-high**	Transparent planning records and English help, but UK planning practice, VAT and data handling differ. HMRC says a non-established taxable person making taxable UK sales generally must register for VAT; an overseas company with a UK establishment has filing obligations.	Sell Gate 7/9 remotely; engage UK planning counsel and accountant; quote fees plus VAT if applicable; customer prepays travel.	**PILOT AFTER CANADA**
Norway	**4 / 5 - High**	Excellent public institutions but local language, municipal/grid relationships, EEA/GDPR and tax/registration add friction. Bronnoysund says foreign businesses needing a Norwegian organization number register as an NUF.	Subcontract a Norwegian researcher; sell evidence-schema/QA, not local fact-finding alone; no work without VAT/NUF advice.	**PARTNER-LED ONLY**
United Arab Emirates	**5 / 5 - Very high**	Licensing, tax, national-security, sanctions/export-control and relationship requirements are material. Official UAE materials describe full foreign ownership in many activities, but an economic license and sector approvals can still be required.	Only via a reputable local advisor, portfolio sponsor or prime contractor; U.S. export-controls/sanctions review; UAE counsel; no land or utility representation.	**DEFER**

Foreign recommendation: win two U.S. reference customers first. Then test Canada with one remote, fixed-fee evidence assignment. Do not create a foreign entity, travel, control land or hire a local agent until a paying customer and local counsel define the need.

Honest viability evaluation

What could work, what probably will not, and the thresholds that decide

Dimension	Assessment	Evidence and implication
Customer pain	**REAL**	Power, entitlement and community constraints make bad-site diligence expensive. The provided Arizona work found capacity unknown for 248 of 255 infrastructure candidates and utility assignment ambiguous for 181 of 255 - exactly the uncertainty a human-verified evidence product addresses.
Willingness to pay	**PLAUSIBLE, NOT PROVEN**	Avoided diligence is worth far more than a $7.5k-$20k fee, but sophisticated firms already employ internal teams and trusted consultants. You need paid pilots, not compliments, to prove the wedge.
Solo delivery	**VIABLE WITH LIMITS**	Gates 0-3, 7-9 can be productized. Gates 5-6 require experts. Gate 10 and full development are incompatible with one founder.
Competitive undercut	**VIABLE ON ENTRY SCOPE**	You can offer a lower initial ticket and faster decision than a broad consulting engagement. You cannot sustainably underprice licensed engineering, title, legal or environmental work.
Sales efficiency	**WEAK**	The modeled cold list produces about 1.8 expected pilots and $19k of first-pilot billings. A single warm channel can be more valuable than 50 additional cold names.
Capital risk	**LOW IF DISCIPLINED**	The service model can be tested under $5k and made cash-positive with upfront payment. Land options, speculative studies and self-funded experts would reverse that advantage.
Defensibility	**LOW AT FIRST; CAN IMPROVE**	A generic memo is commoditized. Defensibility comes from a consistent evidence schema, local call history, source/expiry tracking, expert relationships and customer trust.
Founder credibility	**MATERIAL RISK**	A 22-year-old law student will not win by presenting as a power or engineering expert. The credible position is disciplined researcher/orchestrator with transparent limits and named senior reviewers.
Overall	**CONDITIONAL GO**	Run a 90-day paid-pilot test. Continue only if you close at least one $7.5k-plus project, receive 60% upfront, deliver within 30 founder hours and obtain a reference or referral.

90-day scorecard	Continue	Change course / stop
Demand	1 paid $7.5k-plus pilot or 2 paid $3.5k-plus sprints	No paid work after 40 high-quality sequences and 5 warm asks
Unit economics	65%+ cash gross margin; 30 hours or less for Gate 2	Client-funded experts still push margin below 50% or work above 45 hours
Trust	Written reference, repeat scope or 2 qualified referrals	Clients value the memo but will not refer, repeat or pay upfront
Risk	Counsel-approved MSA/SOW; insurable exclusions; secure workflow	Customer demands power assurances, success fees, land marketing or uncapped liability

The next 90 days

A reversible test with hard learning milestones

Window	Build	Sell	Proof required
Days 1-15	Counsel-review entity/MSA/SOW; one anonymized Gate 2 sample; evidence schema; secure room; CRM fields; expert roster.	Ask 5 warm channels for critique and one introduction each. Research first 20 names from this report.	At least 3 buyer calls and one written objection log. Spend no more than $2,500.
Days 16-45	Refine the five-day checklist and time every task. Prepare a Gate 7 monitoring sample from a public project.	Run 20 customized sequences. Quote fixed fee, 60% upfront and expert pass-through on every serious call.	One paid sprint/pilot or two procurement/vendor-registration paths with named sponsors.
Days 46-75	Deliver first work; document hours, source quality, scope changes and customer decisions.	Ask for reference, repeat scope and two introductions at the readout. Start next 20 names only if delivery is on time.	Delivery in 30 hours or less; 65%+ cash gross margin; one reference/referral.
Days 76-90	Choose one niche: political watch, conversion red-team, or evidence passport. Archive everything else.	Package the proven niche and approach the next 20 lookalikes. Do not expand countries or gates yet.	Continue only if 90-day scorecard passes. Otherwise revise offer or stop before spending the reserve.

Final recommendation: launch Synchronicity as a narrow Gate 2/7/9 evidence company with a $5,000 validation cap. Do not spend on land, do not promise power, do not chase hyperscalers directly, and do not accept work that requires you to impersonate an engineer, broker or experienced development principal.

Limitations

- Research cutoff: 29 August 2026. Public pages can change after the cutoff.
- A public project announcement is a sales trigger, not proof of land control, available power, executed utility service, financing, permits or tenant commitment.
- Some sources are sponsor-authored. Sponsor claims were treated as signals and are not independently verified unless an official record or filing was cited.
- Cleanview's market tracker is a useful directional secondary source; planned capacity can include early-stage, duplicate, delayed or speculative projects.
- Probability ranges are judgmental base rates informed by organization size, procurement friction, public need and product fit. They have not been calibrated against Synchronicity's actual conversion history because none was supplied.
- Capital and fee ranges are management planning scenarios, not market quotes or offers. Taxes, insurance, travel and expert budgets vary by scope and jurisdiction.
- No company in this report has been contacted, qualified or represented as interested in Synchronicity.
- This report is not legal, tax, engineering, environmental, title, utility, brokerage, securities or investment advice.

Evidence-class convention

V4 = executed/parcel-specific official or professional evidence; V3 = official public evidence; V2 = reliable secondary source or documented call; V1 = proxy; V0 = unknown. Synchronicity should never allow a V1 proxy to become a customer-facing claim of 'powered', 'available MW', 'ready', 'approved' or 'buildable'.
