50 smaller sites for a 20–30 MW inference buyer

A first-call research book for William James Ernst

50 new advertised offerings • 16 states • median 10.02 gross acres • median ask $830,500

33 asks below $1 million. 43 offerings at or below 20 gross acres. Asking prices range from $97,900 to $2,201,150. These are additional to the earlier 70, checked by listing URL and identity.

Decision today: start with the top 10 document calls. Zero sites are cleared for a paid option. Assignment probability is NOT ESTIMABLE for every site. None has written parcel-specific confirmation of 20–30 MW or two suitable fiber routes.

The difference matters: attractive asking prices and industrial zoning justify a call. They do not establish a feasible data center, an assignable option, a paying developer or a profit.

How to use this book

The ranked index links directly to listings. Each one-page card gives price, parcel references, broker/government/utility contacts, the decisive obstacle and a concrete opening option proposal. The companion CSV supports filtering. The ZIP includes all 50 parcel-specific option drafts and the 52-factor evidence audit.

Availability basis: a public for-sale/active advertisement was retrieved on September 23; no seller was contacted. Some listings are old or contain conflicting fields. This is targeted sourcing, not an exhaustive census of every land listing.

Recommended initial cash commitment: $0. Request documents and explore terms before buying control. All monetary terms in this book are unaccepted planning proposals.

The buyer card and decision rules

Target workload

20–30 MW total facility demand for latency-sensitive inference. This is not a confirmed buyer order. If a buyer means 20–30 MW of IT load, rescreen the electrical demand and cooling design; at an illustrative PUE of 1.3–1.4 that would be 26–42 MW at the facility boundary.

Prefer 5–20 net developable acres, urban/regional customer proximity, permissible industrial/commercial use, adequate height and floor area, diverse fiber routes and an affordable dated utility path. Gross acres in the listings are not buildable acres. Seven larger offerings remain because their price/footprint may justify a call; no undefined split is counted as a separate candidate.

Metrobloks public acquisition criteria describe 5–20 developable acres, the ability to procure 20 MW+, metro/IXP proximity and suitable zoning/height. Dataprana's land and energy page describes a 10–50 MW regional strategy. These are class-fit references only; neither buyer has expressed interest in these parcels or agreed to pay Syncranicity.

What the state maps contribute

The project's September 20 US Data Center Atlas supplies state context and policy-adjusted scores. The inference profile gives more weight to buyer geography and fiber than the original pilot. Electricity markets, local demand and network access are separate questions: an attractive state average or nearby industrial load does not establish spare power. Each card includes the state screen, without treating it as a tariff quote or capacity confirmation.

Three different numbers

Call-priority /100 is an ordinal analyst ordering: land basis, industrial footprint, metro relevance, document/contact availability and visible obstacles. It is not calibrated; a few points are not meaningful statistical differences. The full 52-factor score is separately evidence-discounted. Assignment probability is separately NOT ESTIMABLE.

52-factor inference weights: power 23; buyer 15; fiber 20; land 9; jurisdiction 10; environment 8; water 5; commercial 5; sustainability 3; execution 2. Each known listing signal is V1 (quality 0.25), with only partial 1/5 factor credit. Unknown factors receive no supported points. Confidence is Σ(weight × quality); coverage is Σ(weight with any usable signal). Neither substitutes for probability. Full ratings, sources and next proofs are in the audit CSV.

No manufactured assignment odds

Under the September 23 project policy: P(success | acceptable control) = P(T) × P(D | T) × P(B | T,D) × P(C | T,D,B). Technical/legal feasibility, funded evidence/time, a paying buyer, and close/collect all need support. Seller acceptance is separate. No retained site has supported component estimates or a calibrated comparable cohort. Historic percentages in the earlier batch should not be treated as calibrated investment forecasts.

What a first deal could look like

Unaccepted opening proposal

First seek existing documents and a nonbinding, no-deposit indication of terms. If the site subsequently clears all required feasibility, probability, capital and legal gates, propose $500 for a 180-day assignable option, plus a $1,000 / 180-day extension. Anchor purchase price to the displayed ask; negotiate price and terms together. These unusually low fees may be rejected. A free preliminary discussion does not secure exclusivity.

Each draft addresses exact legal land, title/authority, access, environmental and utility diligence, seller cooperation, transfer and reliance rights, notice/exercise, closing, refund exceptions and termination. Existing tenants, public sellers, park covenants and broker agreements need specific treatment. Local counsel must complete a transaction-specific agreement; assignment and compensation rights are not assumed.

Cash and profit arithmetic

$1,500 maximum modeled option/extension consideration + $2,500 proposed initial learning/legal envelope = $4,000 modeled loss if everything is spent and nothing recovered. This is a spending envelope, not a quote for complete diligence. Utility studies, deposits, engineering, upgrades, closing costs and company cash are unknown. Stop or obtain a separately funded plan if necessary work exceeds the envelope.

Illustration only: $25,000 retained assignment receipts − $4,000 costs = $21,000 pretax profit; no receipts = $4,000 loss. Economic break-even = 16%. The project policy’s 1.5 error buffer raises that hurdle to 24%, before other gate/capital conditions. Those are required economics, not predicted chances. Unquoted costs and founder time could raise the hurdle.

Success definition for later forecasting: lawful assignment closes and cash is collected within 12 months after acceptable control and before option expiry, leaving at least $10,000 pretax net profit after all project costs. The proposed option expires after 360 days, so expiry controls. The objective is a transferable, buyer-accepted development path; power need not already be energized, but the buyer must accept its timing and cost.

First ten calls: documents before deposits

1. Broker: active status, scope, exact APNs/survey, owner authority, price, existing reports and assignable-option willingness. 2. Planning: correct jurisdiction, actual DC/generator use, current restrictions, height/setbacks and hearing path. 3. Utility: exact serving territory and written large-load screening process, including study costs, MW/date, supply, upgrades, tariff and credit. 4. Carrier/buyer: endpoints, diverse paths, actual capacity and funded acquisition requirement. No inquiry or outreach was sent by this research run.

Stop if the footprint cannot fit, use is infeasible, seller will not allow lawful transfer, timing cannot fit affordable control, no buyer pays for the evidence, or the next step exceeds funded limits. Keep the existing $5,000 learning / $10,000 cumulative soft-control limits and one paid position; reserve and repeat-attempt requirements still apply.

Ranked listing index

Call priority is not assignment probability. Assignment chance: NOT ESTIMABLE for every row.

CANDIDATE 01 / CALL PRIORITY 84/100 / AL

2900 24th Avenue N, Birmingham

$750,000 | 11 gross acres | $68,182/acre

Open the advertised listing and broker inquiry

Jefferson County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? M-2 heavy industrial; public water, sewer, electricity and gas advertised; metro industrial location.

Decisive obstacle. Month-to-month occupant and prior industrial use; confirm vacant delivery, Phase I and utility load path.

PIN / APN. 22-00-24-2-014-001.001. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Birmingham consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

People and the next question

Broker / listing inquiry: Jason Koenig, Keller Williams Homewood · 205-283-6391

Government: Birmingham Planning, Engineering and Permits · 205-254-2211

Utility: Alabama Power economic development · 888-430-5787

Government and utility contacts are referrals, not verified service or jurisdiction. Some direct broker numbers were unavailable; the listing inquiry remains linked.

First move. Ask the broker for active status, current price, complete APNs/survey and existing utility/environmental documents. Resolve this first: Month-to-month occupant and prior industrial use; confirm vacant delivery, Phase I and utility load path.

Opening option proposal

$750,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $748,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-al-2900-24th-avenue-n-birmingham.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.71/100 supported points; confidence 3.5%; coverage 14.1%. Project state atlas: Alabama 57/100, rank 14/50. Separate TVA and Alabama Power territories; verify expansion schedules, storm resilience, and rural route diversity.

CANDIDATE 02 / CALL PRIORITY 81/100 / AR

000 Allied Way, Little Rock

$563,250 | 22.53 gross acres | $25,000/acre

Open the advertised listing and broker inquiry

Pulaski County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? I-2 industrial; I-30 access; existing engineering report offered.

Decisive obstacle. Obtain engineering report and exact APNs; do not assume it addresses power, wetlands or a DC layout. Listing also notes a pond; exclude water and buffers from usable area.

PIN / APN. Not published in retrieved listing. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Little Rock consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

Fees credited at closing; nominal land balance $953,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-mo-5019-raytown-road-kansas-city.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.64/100 supported points; confidence 3.2%; coverage 12.7%. Project state atlas: Missouri 57/100, rank 13/50. Test utility/RTO borders, power date and local approvals; general regional affordability is not a seller option quote.

CANDIDATE 07 / CALL PRIORITY 75/100 / IN

Majic Port Lane, Fort Wayne

$600,000 | 6.6 gross acres | $90,909/acre

Open the advertised listing and broker inquiry

Allen County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? Three industrial lots; gas, electric, water, sewer and internet hookups advertised.

Decisive obstacle. Confirm contiguous ownership, HOA restrictions and whether net area can fit the complete facility.

PIN / APN. Not published; three offered lots. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Fort Wayne consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

People and the next question

Broker / listing inquiry: Listing agent via linked Land and Farm listing · Direct phone unverified; use linked contact route

Government: Fort Wayne / Allen County Department of Planning Services · 260-449-7607

Utility: Indiana Michigan Power economic development; territory unconfirmed · 800-311-4634

Government and utility contacts are referrals, not verified service or jurisdiction. Some direct broker numbers were unavailable; the listing inquiry remains linked.

First move. Ask the broker for active status, current price, complete APNs/survey and existing utility/environmental documents. Resolve this first: Confirm contiguous ownership, HOA restrictions and whether net area can fit the complete facility.

Opening option proposal

$600,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $598,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-in-majic-port-lane-fort-wayne.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.63/100 supported points; confidence 3.2%; coverage 12.6%. Project state atlas: Indiana 57/100, rank 11/50. Check utility territory and actual collateral/minimum-bill terms; prove local acceptance despite state incentive eligibility.

CANDIDATE 08 / CALL PRIORITY 75/100 / NC

3346 Cansler Circle, Newton / Maiden

$630,000 | 10.62 gross acres | $59,322/acre

Open the advertised listing and broker inquiry

Catawba County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? Industrial park; water, sewer, phone and internet advertised; broker says annexed into Maiden.

Decisive obstacle. Resolve exact zoning with Maiden; nearby Apple data center does not establish spare power or buyer demand.

PIN / APN. Not published in retrieved listing. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Hickory / Charlotte regional consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

$640,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $638,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-nc-141-back-forty-drive-winston-salem.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.61/100 supported points; confidence 3.1%; coverage 12.2%. Project state atlas: North Carolina 61/100, rank 8/50. Check utility pipeline, backup permits and local land use; coastal versus inland hazard conditions differ materially.

CANDIDATE 18 / CALL PRIORITY 68/100 / MI

2237 Parkwood Avenue, Ypsilanti Township

$900,000 | 24.95 gross acres | $36,072/acre

Open the advertised listing and broker inquiry

Washtenaw County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? I-T industrial technology; Detroit/Ann Arbor region; larger footprint at moderate ask.

Decisive obstacle. Long tract; reconcile 24.92/24.95 acres, access, airport overlays and usable contiguous pad.

PIN / APN. 11-02-481-007; 11-11-100-006. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Ann Arbor / Detroit consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

People and the next question

Broker / listing inquiry: Charlie Koenn, Swisher Commercial · 734-926-0230

Government: Ypsilanti Township Planning Department · 734-544-4000 ext. 1

Utility: DTE Energy business development; territory unconfirmed · 855-367-0255 · econ_dev@dteenergy.com

Government and utility contacts are referrals, not verified service or jurisdiction. Some direct broker numbers were unavailable; the listing inquiry remains linked.

First move. Ask the broker for active status, current price, complete APNs/survey and existing utility/environmental documents. Resolve this first: Long tract; reconcile 24.92/24.95 acres, access, airport overlays and usable contiguous pad.

Opening option proposal

$900,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $898,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-mi-2237-parkwood-avenue-ypsilanti-township.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.64/100 supported points; confidence 3.2%; coverage 12.7%. Project state atlas: Michigan 48/100, rank 33/50. Water abundance does not establish withdrawal rights; distinguish utility service and prove local approvals, routes and brownfield liabilities.

Utility: FirstEnergy Ohio Edison economic development; territory unconfirmed · 800-633-4766

Government and utility contacts are referrals, not verified service or jurisdiction. Some direct broker numbers were unavailable; the listing inquiry remains linked.

First move. Ask the broker for active status, current price, complete APNs/survey and existing utility/environmental documents. Resolve this first: Confirm actual district and parcels; no demonstrated power, carrier route or usable footprint.

Opening option proposal

$1,150,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $1,148,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-oh-highland-valley-view-road-e-macedonia.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.40/100 supported points; confidence 2.0%; coverage 8.0%. Project state atlas: Ohio 48/100, rank 30/50. Strong listed ecosystem does not establish spare capacity; check utility-specific minimum bills, guarantees and local litigation.

CANDIDATE 29 / CALL PRIORITY 63/100 / KS

Lots 3–4 Schulte Industrial Park, Wichita

$764,587 | 10.03 gross acres | $76,230/acre

Open the advertised listing and broker inquiry

Sedgwick County · checked 23 September 2026 · seller not contacted

Advertised total ask; availability, scope and price have not been confirmed by seller.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? Industrial zoning; electricity/public water advertised; two road approaches.

Decisive obstacle. Sewer and buyer demand for 20–30 MW inference unproven; do not infer network performance from industrial park.

PIN / APN. Not published in retrieved listing. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Wichita consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

Enterprise Drive, Allen Park Tech Center — 7.43-acre offer

$1,114,500 | 7.43 gross acres | $150,000/acre

Open the advertised listing and broker inquiry

Wayne County · checked 23 September 2026 · seller not contacted

Calculated: 7.43-acre alternative × $150,000/acre = $1,114,500; split and complete APNs unresolved.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? Broker narrative offers 7.43 acres or 17.85 acres at $150,000 per acre.

Decisive obstacle. Price calculated for 7.43-acre alternative; page header emphasizes 17.85; C6C commercial zoning and lot split unresolved.

PIN / APN. 30-008-99-0001-712 (parent reference; offered split unverified). Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Detroit consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

Assignment chance: NOT ESTIMABLE. Paid-control decision: HOLD. No committed 20–30 MW, suitable fiber routes, executed control or paying buyer.

Why spend a call? Light-industrial primary broker listing in Detroit airport region.

Decisive obstacle. Approximately 239 by 1,761 feet: narrow geometry may defeat 20–30 MW layout; concept-fit test first, no paid control.

PIN / APN. Not published in retrieved listing. Published references only; exact land, owner and title are not verified.

Power and fiber. No written parcel-specific 20–30 MW capacity, delivery date, supply, upgrades or tariff evidence. Ordinary utilities in a listing are not large-load capacity. No verified route map, dual entrance/diverse paths, available lit/dark capacity, construction price or buyer-endpoint latency. Internet availability is insufficient.

Buyer / market. Detroit consumer/enterprise demand hypothesis. Metro proximity is geographic screening; buyer geography, load-serving power market and measured latency remain unverified.

People and the next question

Broker / listing inquiry: Colliers listing team, Contact Expert on listing · Direct phone unverified; use linked contact route

Government: Romulus Planning Department · 734-955-4530

Utility: DTE Energy business development; territory unconfirmed · 855-367-0255 · econ_dev@dteenergy.com

Government and utility contacts are referrals, not verified service or jurisdiction. Some direct broker numbers were unavailable; the listing inquiry remains linked.

First move. Ask the broker for active status, current price, complete APNs/survey and existing utility/environmental documents. Resolve this first: Approximately 239 by 1,761 feet: narrow geometry may defeat 20–30 MW layout; concept-fit test first, no paid control.

Opening option proposal

$375,000 price anchor; $500 / 180 days + $1,000 / 180-day extension, assignable subject to expressly negotiated lawful rights. Fees credited at closing; nominal land balance $373,500 plus costs if both fees paid. Seller acceptance, buyer funding and assignment premium unknown. $4,000 initial modeled fee/learning envelope is not a full diligence quote. Begin with no-deposit document/terms discussions.

Parcel-specific counsel draft: inf50-mi-eureka-road-east-of-harrison-romulus.txt in the companion ZIP. All prerequisites on pages 2–3 apply.

Evidence audit: 0.56/100 supported points; confidence 2.8%; coverage 11.2%. Project state atlas: Michigan 48/100, rank 33/50. Water abundance does not establish withdrawal rights; distinguish utility service and prove local approvals, routes and brownfield liabilities.

Run log: exclusions and coverage

New: 50 • Paid-ready: 0 • Assignment estimates supported: 0

States represented: AL, AR, GA, IA, IL, IN, KS, KY, MI, MO, NC, OH, OK, SC, TN, WI

These are candidate states, not a statement that every listing in each state was searched. Discovery used 68 targeted queries and follow-up checks. Fifty-nine individual listing pages were retrieved; nine were excluded or held outside this batch. Search-result-only leads were not counted as fully screened.

SOLD: 14707 Prospect Avenue, Kansas City, MO 64146 | MLS: 2578723 | Land and Farm — Sold offering excluded.

PENDING: gREENWICH RD, SEVILLE, OH 44273 | REMAX — Pending status on current listing; excluded from active queue.

FOOTPRINT / UTILITIES HOLD: 737 100th Street Southwest, Byron Center, MI 49315 | MLS #25052830 — 5.21 gross acres with stream and absent utilities: no supported usable footprint for this card.

OUTSIDE TARGET: Development Opportunity, 31.5 +/- AC - Freeman Commercial Real Estate — 31.5-acre mixed-use tract; larger and more complex than this first-entry search.

ENTITLEMENT HOLD: 12.7 AC Commercial/Industrial Land - 1388 Fire Tower Rd. and 175, 177 & 185 Porter Rd., Ro — Four-parcel offering needs annexation and future industrial zoning; held outside this lower-complexity batch.

UNPRICED: Published: 2025-03-07 — No firm public asking price recovered.

PRICE / TRANSFER HOLD: 4490 12th St, West Columbia, SC 29172 - Saxe Gotha Industrial Park | LoopNet — Conflicting per-acre pricing and public park covenants; assignment permission not established.

SPLIT / USE HOLD: 6305 W 190th Street (7Acres), Jordan, MN 55352 | MLS: 6817850 | LandWatch — Industrial future guidance does not establish current industrial permission or exact offered split.

ENVIRONMENTAL HOLD: 9170 Latty Ave Saint Louis, MO 63134 - Land Property for Sale on Showcase.com — Coldwater Creek adjacency warrants specialist environmental work unsuitable for the first low-cost pass; actual contamination of this parcel is not established.

Source and process limits

Sources include broker and MLS pages, Land.com-network listings, LandHub and LoopNet. Active advertisement does not guarantee current availability. Twenty-two cards have some published parcel identifiers, often partial or parent references; no title/APN schedule is fully certified. Provider capacity, tariffs and approvals remain unresolved. No exact parcel polygons are fabricated.

Project inputs: September 20 US Data Center Atlas; 52-factor decision policy and pre-option rules; September 23 buyer handbook and Probability, Capital and Stop Gates. Public buyer criteria checked September 23. Contact sources retain retrieval dates in the CSV/catalog. This run is manually assembled research; it does not prove recurring automation delivery.

Keep the earlier 70 records and founder decisions. The new research is a separate inference batch. Revisit rankings when actual utility, layout and buyer evidence arrives; do not pay for the appearance of precision.
