SYNCRANICITY / U.S. DATA CENTER ATLAS / MAP 1

Incentives, adjusted for policy risk

New-project benefit breadth and policy friction • analyst rubric, not tax savings

70% benefit breadth + 30% policy posture. Unknown politics = 50, not low risk. New intake pauses receive zero benefit credit.

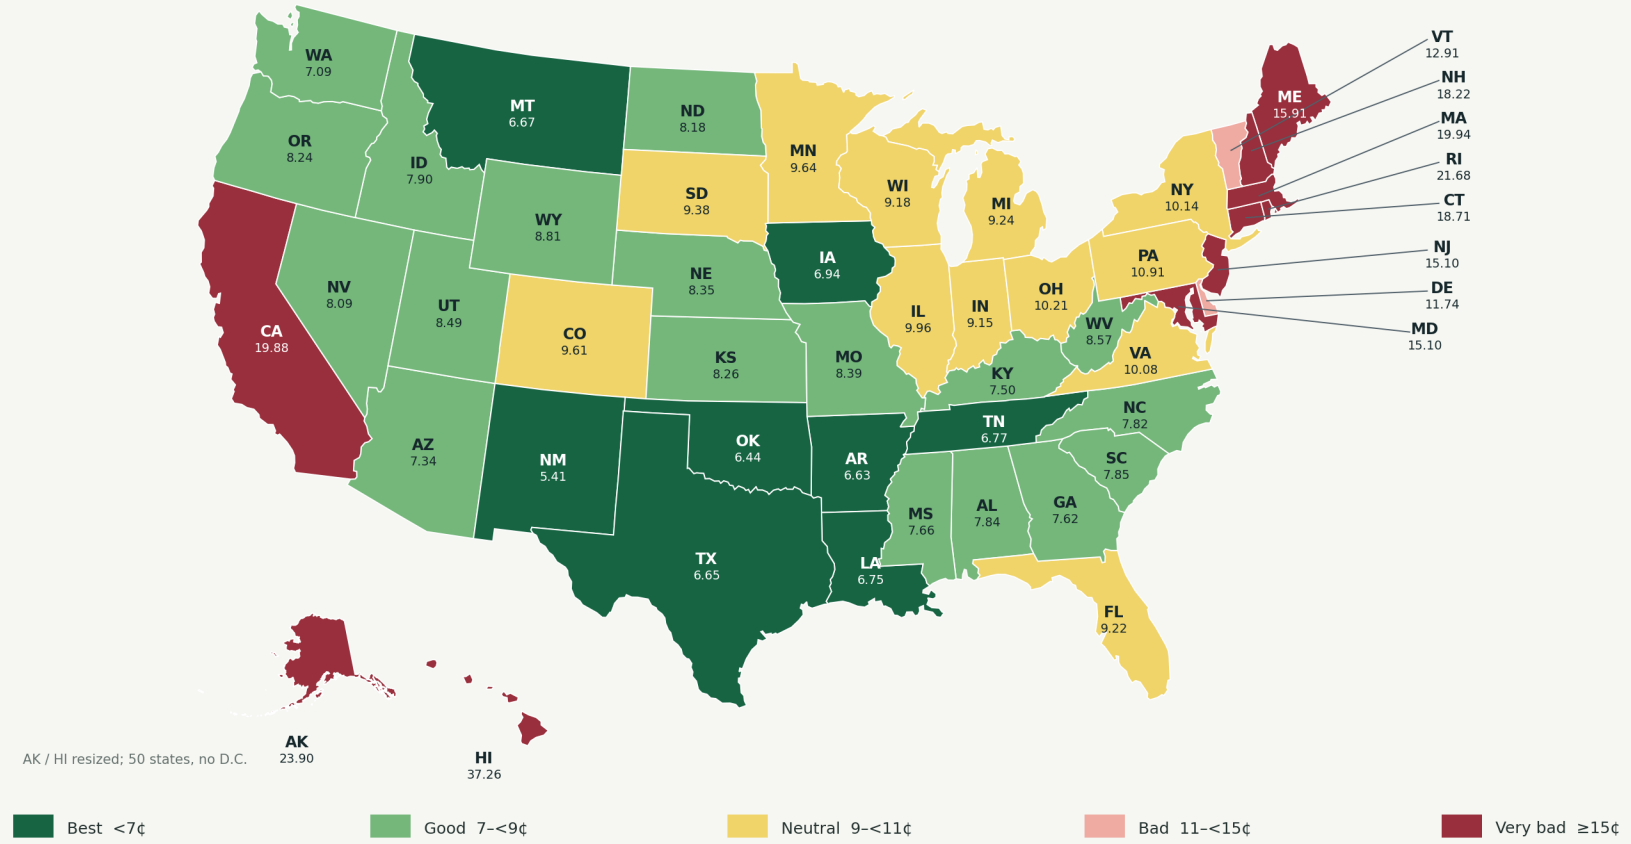

Sources: EIA; state laws/agencies; NCSL; Data Center Map; USDA. Full evidence and limitations in the atlas. | 20 September 2026

Interpretation: benefit breadth is not project-eligible tax savings. Illinois intake pause is primary-confirmed; Arizona pause is conservatively assumed amid conflicting published materials. Local political conditions remain unverified.

SYNCRANICITY / U.S. DATA CENTER ATLAS / MAP 2

Electricity price: industrial benchmark

EIA January–June 2026 • cents/kWh • lower is better

Annual scenario: 100 MW facility load × 90% utilization × 8,760 hours. Every 1¢/kWh difference = $7.884 million/year.

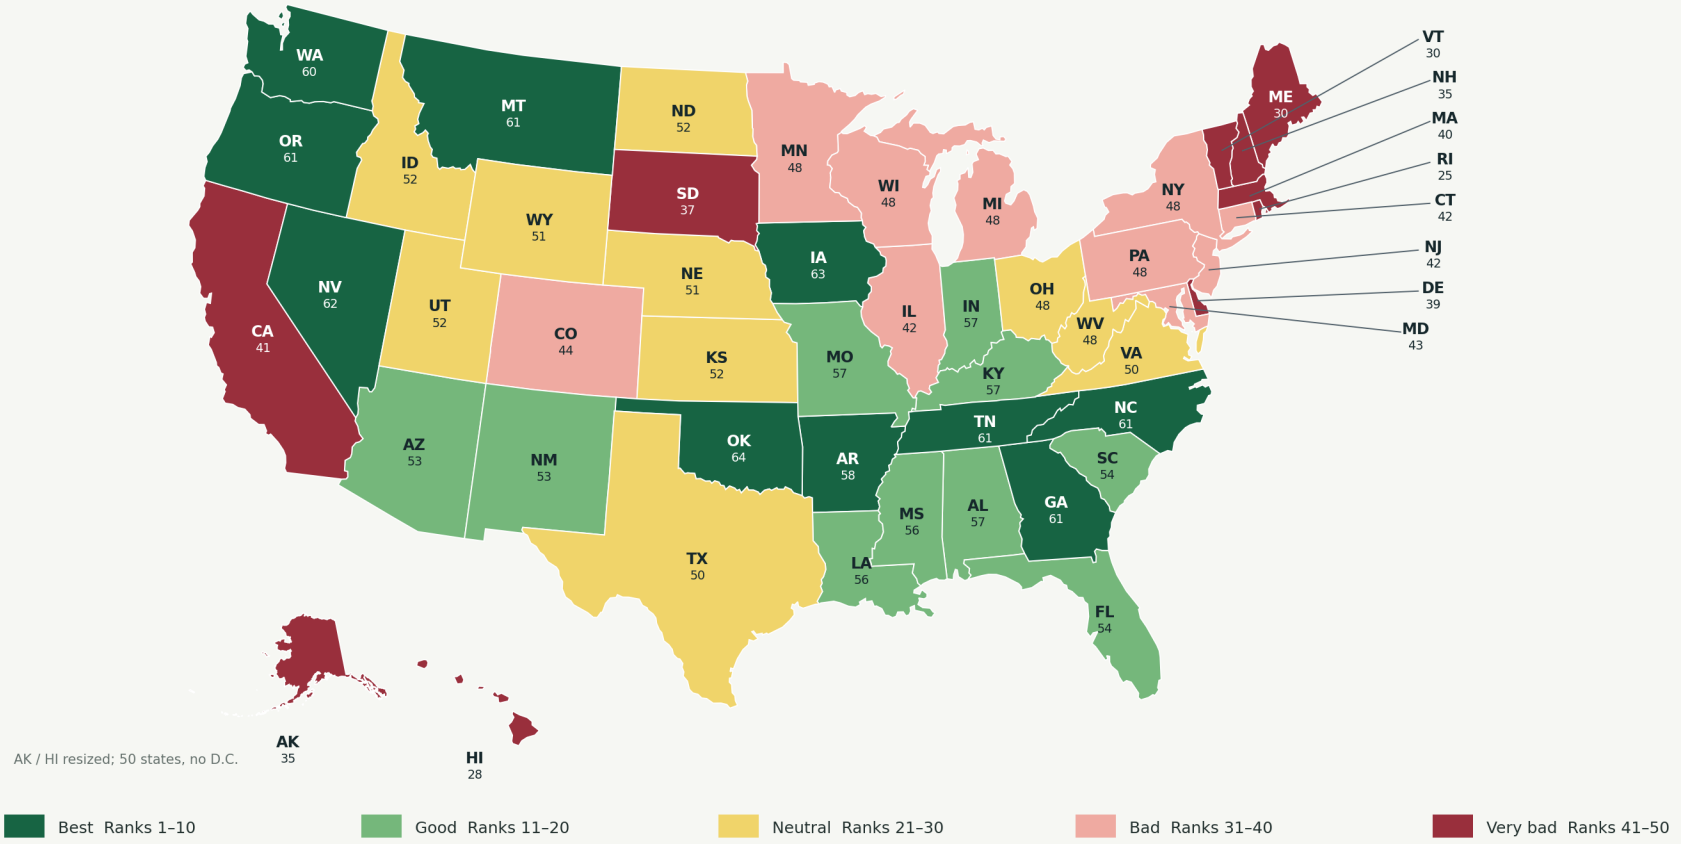

Sources: EIA; state laws/agencies; NCSL; Data Center Map; USDA. Full evidence and limitations in the atlas. | 20 September 2026

Benchmark example: New Mexico 5.41 cents/kWh versus the U.S. industrial average 8.89 implies $27.44m/year lower cost at the stated 100-MW/90% scenario. This does not establish an obtainable utility rate.

SYNCRANICITY / U.S. DATA CENTER ATLAS / MAP 3

Overall state screening priority

Provisional composite • relative quintiles • site-critical factors unresolved

40% of model weight is reserved for unresolved grid, water, environmental, control, sustainability and execution evidence.

Sources: EIA; state laws/agencies; NCSL; Data Center Map; USDA. Full evidence and limitations in the atlas. | 20 September 2026

Use as a research shortlist only. All states have unresolved site-critical factors; a high macro score cannot override a failed utility, water, title, local-permission or buyer gate. Texas/New York have an analyst regulatory hold pending primary-scope verification.

How to use the atlas

Open the HTML atlas for state selection, full evidence notes, the savings calculator and ranking sensitivities. This PDF carries the static maps, methodology, 50-state ledger and project-factor crosswalk.

Current screen: where to investigate first

Base rank	State	Base score	Industrial c/kWh	Commercial c/kWh	Commercial rank	Training rank	Colo rank
1	Oklahoma	64	6.44	8.81	3	1	8
2	Iowa	63	6.94	10.89	6	5	4
3	Nevada	62	8.09	9.19	1	6	3
4	Tennessee	61	6.77	13.70	20	4	9
5	Oregon	61	8.24	10.57	2	15	1
6	Montana	61	6.67	12.67	19	2	13
7	Georgia	61	7.62	11.52	8	14	2
8	North Carolina	61	7.82	10.55	4	10	6
9	Washington	60	7.09	11.88	15	9	7
10	Arkansas	58	6.63	11.46	18	3	28
11	Indiana	57	9.15	14.06	16	21	5
12	Kentucky	57	7.50	12.89	24	13	15
13	Missouri	57	8.39	10.56	5	19	10
14	Alabama	57	7.84	14.79	31	12	18
15	Louisiana	56	6.75	12.07	29	7	29

Strong sensitivity is a result, not a defect

Tennessee ranks 4th in the industrial-base screen but 20th when commercial prices replace industrial; Montana moves from 6th to 19th. This is why a utility-specific tariff must precede a buyer savings claim. Nevada, Oklahoma, Oregon and North Carolina remain useful comparisons across these two price cases, but water, power delivery and local acceptance are still open.

What these maps establish

These are 50-state research screens for a new U.S. data-center development, prepared 20 September 2026. Map 1 measures incentive breadth after an explicit policy-risk adjustment. Map 2 measures electricity-price benchmarks. Map 3 combines these with market and land proxies, while reserving weight for the site-specific constraints in Syncranicity's project policy. Map 3 is a provisional research-priority ranking, not a verified list of the best buildable states or an investment recommendation. No state has passed the 16 paid-control gates. Dark green means strongest under the stated screen, not approved, powered, or risk-free.

Evidence coverage and freshness

Electricity: all 50 states, EIA January-June 2026 year-to-date preliminary estimates, released 26 August 2026. Commercial and industrial averages are both retained. Incentives: NCSL's 1 April 2026 statutory survey is the national baseline, supplemented with the specific primary statutes/program pages in the source register and selected later policy developments. This is not a completed 50-state September legislative or local-ordinance audit. Rows using only the April baseline are visibly marked. Political scores default to unresolved where evidence is insufficient; party control is not used as a substitute for developer acceptance. Facility counts are a 20 September 2026 directory snapshot. Land values are USDA's August 2025 farm-real-estate series: 48 states; Alaska/Hawaii missing. The attempted 2026 report URL returned unavailable. The older vintage is disclosed rather than presented as current pricing.

Map 1: incentive breadth plus political friction

Score = 70% benefit breadth + 30% policy posture. Benefit categories: 0 = no dedicated statewide program identified or new intake paused; 60 = qualifying equipment relief, an AI-specific credit, or absence of state sales tax; 80 = equipment relief plus electricity relief or property relief, or a no-sales-tax state with a property program; 100 = equipment, electricity and property benefits together. Conditional/local benefits count only as program breadth, not assured eligibility. This is an ordinal analyst rubric, not a dollar-value ranking. A 60-point AI credit is not economically equivalent to a 60-point sales exemption. The state notes disclose differences, thresholds and uncertainty. New Mexico/local bond structures, Oregon enterprise zones and other discretionary programs need separate project analysis.

Political score interpretation

Policy posture is an analyst caution scale: 50 = unresolved/neutral placeholder, not demonstrated low risk; 35 = qualification changes or proposed restrictions that need refresh; 25 = explicit repeal/off-ramp debate or documented local litigation relevant to screening; 10 = current intake pause or severe recent regulatory escalation. No state receives a positive low-risk premium merely because opposition was not found. These coarse state labels do not replace the project's separate welcome/friction/confidence model. Most local approval, opposition and election exposure remains unknown. Map 1 colors: best >=80; good >=65; neutral >=45; bad >=25; very bad <25. A poor incentive color does not mean a state prohibits data centers.

Material policy developments and conflicts

Illinois: the official DCEO page confirms that new incentive applications stopped being processed on 1 July 2026; new benefits are scored zero. Arizona: newer reporting and the supplied project records describe a July 2026-June 2029 application pause, while the ACA program page and retrieved statutory text still display legacy availability. This conflict is explicit; the model assumes no new benefit until resolved. Texas and New York: September reporting describes significant connection/siting intervention; primary operative scope was not obtained. A conservative analyst hold caps Map 3 at 50 pending verification, without declaring all construction legally banned. Virginia: September accountability announcements include proposals requiring later legislation; proposed obligations are not treated as enacted tax costs. Maine: the April construction-freeze bill was vetoed; the map does not label that freeze operative. Other April proposals remain watch items unless updated evidence is listed.

Map 2: electricity is a benchmark, not a tariff quote

Industrial cents/kWh determine the static map: best <7; good 7 to <9; neutral 9 to <11; bad 11 to <15; very bad >=15. Industrial average retail revenue per kWh includes the billed mix of existing industrial customers; it is not the marginal energy-only rate available to a new data center. Data centers can be classified under commercial, industrial, or special large-load tariffs. The atlas therefore offers the commercial series and a commercial-price sensitivity. Do not add a generic demand charge on top of an EIA average and call that a quote; replace the benchmark with an actual full-bill model. New capacity upgrades, customer security, special minimum bills, exit liabilities and energization delays are not priced here. State averages can conceal large utility and regional differences.

Annual electricity calculation

Annual kWh = facility MW x 1,000 x annual utilization x 8,760. Annual cost = kWh x benchmark cents/kWh ÷ 100. Savings = kWh x (reference cents/kWh - candidate cents/kWh) ÷ 100. Default: 100 MW facility load, 90% utilization, 788.4 million kWh/year; a 1-cent difference equals $7.884 million/year. If starting with IT load, facility MW = IT MW x modeled PUE; for example, 80 MW IT x 1.25 PUE = 100 MW facility. The calculator assumes stable rates, flat annual utilization and comparable boundaries. It is an annualized scenario using six-month observed averages, not an EIA full-year forecast or a savings guarantee. No incentive discount is subtracted again from the EIA rate.

Map 3: explicit state-level overlay

Base score weights: industrial price percentile 20%; incentive breadth 10%; policy posture 10%; listed-facility ecosystem percentile 15%; USDA farm-value affordability percentile 5%; unresolved grid/delivery 15%; water/cooling 8%; civil/environment/hazards 7%; control/runway 5%; sustainability/energy procurement 3%; execution/logistics 2%. Total 100%. Each unresolved component receives 50/100 with its weight preserved. These weights are analyst choices for state screening, not the project's 52-factor parcel weights. No state-level proxy certifies a parcel factor. Map 3 colors are relative quintiles: ranks 1-10 best, 11-20 good, 21-30 neutral, 31-40 bad, 41-50 very bad. A bottom-quintile state can still contain a superior site for a specific buyer.

Normalization, uncertainty and sensitivity

Numeric proxy scores use midrank percentiles across the available states: 100 x [number below + (number tied - 1)/2] ÷ (N - 1). Price and land percentiles are reversed so lower is better; ecosystem percentiles favor more listed facilities. Alaska/Hawaii land is 50 with missingness retained. Ranking uses unrounded scores; exact ties use alphabetical order. Displayed integer scores are not measured probabilities. The unresolved-only lower/upper envelope sets the explicit unknown components to 0/100 while holding other proxies fixed; it is not a confidence interval and does not capture every proxy error. Typical unresolved weight is 40-55%, so intervals overlap heavily. An exact ordering among close states is weak evidence. The Texas/New York cap is a disclosed research rule, not a statutory threshold.

Workload alternatives

The interactive atlas recomputes ranks for four cases. Base: price 20%, ecosystem 15%. Commercial sensitivity: same weights but commercial electricity percentiles replace industrial. AI training: price 30%, ecosystem 5%. Inference/colocation: price 10%, ecosystem 25%. Other weights and unknowns stay fixed, and the Texas/New York cap applies to each case. These scenarios do not establish latency, GPU-cluster topology or actual buyer preferences. A real buyer requirement card controls; federal/sovereign work adds procurement, security, ownership and contracting conditions that state incentives cannot satisfy. Government enthusiasm is not an award or a buyer commitment.

What the additional proxies can and cannot say

Listed facilities provide a reproducible indicator of an existing industry ecosystem, combining network, contractor and customer context once to avoid counting the same signal several times. Counts do not establish operational MW, available racks, new demand, scarcity or low competition; listed projects may differ in status and scale. USDA farm values give only broad ordinary-use land context, with just 5% weight; they include farm buildings and cannot price an industrial parcel, usable acre, option or powered campus. Climate, water, hazards and grid headroom are not given invented statewide numerical measurements. Their weight remains unresolved, and each state has targeted questions. This limits Map 3's completeness but preserves the project's “unknown means unknown” rule.

Applying the Syncranicity files

The 8 September Selection Factors and Gates policy and 9 September Pre-Option Research Playbook govern over older promotional fees, probabilities and node scores. All 52 factors are crosswalked in the annex; all 34 diligence topics and 16 paid-control requirements remain active. The original pilot group weights (25 power; 12 buyer; 12 fiber; 12 land/control; 12 permission; 8 civil/environment; 7 cooling/water; 7 economics; 3 durability; 2 execution) are preserved as reference, not silently repurposed as verified state scores. Older Arizona scores are not imported: the 25 leads lack demonstrated parcel identity and available load capacity; retired generation and regulatory water freedom cannot establish power or water availability.

From state shortlist to a transferable deal

Use the state maps to select a utility territory and workload hypothesis, then test real offered parcels against alternatives. EARLY_MARKET_V1 still requires independent evidence of infrastructure/regulatory change, costly geographically relevant institutional demand, ordinary-use control economics, and a remaining practical/pricing window. None follows from a green state. Track infrastructure, buyer-entry, repricing and affordable-control clocks separately. Confirm the exact serving utility and studyable delivery path; obtain carrier, water, planning and title evidence; model funded studies and rights through an affordable monetization milestone. Preserve the $5,000 learning cap and $10,000 cumulative soft-control cap. No outreach, spending, contract, option or automation change was made by this task.

Closing the evidence gaps

Before relying on any state incentive: obtain current session law/effective dates, written intake confirmation, eligible purchaser/use, capital/jobs/wage/energy tests, local concurrence, benefit term, sunset, clawback and transfer rules. Compare a no-incentive case. Before pricing power: identify serving utility, current applicable tariff, proposed changes, hourly load/ramp, demand ratchets, riders, taxes, minimum take, collateral, upgrade funding, exit obligations and deliverable date. Before ranking a site: verify full parcel geometry, developable layout, legal access, civil/environmental impacts, lawful physical water, diverse fiber, funded buyer interest, enforceable assignment, report reliance and control runway. Refresh political evidence at the actual city/county/utility level, including minutes, votes, litigation and independent public support.

50-state evidence ledger

All values are screening inputs. Policy posture 50 = unresolved, not low risk. All state notes below are diligence directions, not assertions that every location has the listed hazards. Energy scenario: 100 MW facility load at 90% utilization. Negative savings mean higher benchmark costs than the U.S. average.

Alabama (AL) | overall rank 14/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	7.84 / 14.79 cents	$61.81m	$8.28m	45	$4,150

Equipment and non-school property-tax relief. Investment-linked term of 10-30 years; employment and wage tests; verify current approval terms.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Separate TVA and Alabama Power territories; verify expansion schedules, storm resilience, and rural route diversity.

Overall: 57/100; unresolved-only envelope 32-82; unresolved weight 50%. Ranks: commercial 31, training 12, colo 18.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Alaska (AK) | overall rank 46/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	23.90 / 22.81 cents	$188.43m	$-118.34m	8	UNKNOWN

No statewide sales tax. Local sales/property taxes can still apply; no dedicated statewide DC subsidy identified in April baseline.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test isolated-grid supply, fuel logistics, submarine/terrestrial redundancy and construction season; low ambient temperatures alone do not establish viability.

Overall: 35/100; unresolved-only envelope 7-62; unresolved weight 55%. Ranks: commercial 45, training 45, colo 44.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Arizona (AZ) | overall rank 19/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
3/100; benefit 0; policy 10	7.34 / 11.92 cents	$57.87m	$12.22m	160	$4,180

New-applicant tax relief treated as paused. Reported July 2026-June 2029 pause; ACA page still describes older program. Resolve session-law/grandfathering conflict before underwriting.

Evidence: Conflict: older official page vs newer pause reporting; conservative no-benefit case. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Separate Phoenix ecosystem from rural leads; prove lawful water, heat-rejection design, exact utility and tariff; legacy retired-MW scores are quarantined.

Overall: 53/100; unresolved-only envelope 33-73; unresolved weight 40%. Ranks: commercial 30, training 23, colo 17.

Incentive evidence: https://www.azcommerce.com/incentives/computer-data-center-program/

Policy evidence/watch: https://www.axios.com/local/phoenix/2026/07/08/data-center-tax-break-applications-double-moratorium

Arkansas (AR) | overall rank 10/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	6.63 / 11.46 cents	$52.27m	$17.82m	12	$4,250

Equipment, construction-related costs and electricity relief. Act 548: $100m within five years; $1m annualized compensation and positive cost-benefit test; crypto exclusion.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify utility delivery date and carrier diversity before trading low benchmark prices against a smaller listed ecosystem.

Overall: 58/100; unresolved-only envelope 33-83; unresolved weight 50%. Ranks: commercial 18, training 3, colo 28.

Incentive evidence: https://arkleg.state.ar.us/Home/FTPDocument?path=/ACTS/2025R/Public/ACT548.pdf

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

California (CA) | overall rank 41/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
15/100; benefit 0; policy 50	19.88 / 25.53 cents	$156.73m	$-86.65m	296	$13,700

No dedicated statewide DC incentive identified. General business/local arrangements are outside this dedicated-program baseline; absence does not mean zero possible assistance.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test high utility cost against latency-driven demand; local land-use, wildfire, seismic and backup-air-permit screens remain essential.

Overall: 41/100; unresolved-only envelope 16-66; unresolved weight 50%. Ranks: commercial 43, training 46, colo 24.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Colorado (CO) | overall rank 36/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
10/100; benefit 0; policy 35	9.61 / 13.18 cents	$75.77m	$-5.68m	60	$2,290

No dedicated statewide DC incentive in April baseline. 2026 incentive proposal noted; enactment status unresolved. Do not credit proposed benefits.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Denver market access may be valuable; confirm water, air permits and power delivery; cheap statewide farmland is not Denver industrial land.

Overall: 44/100; unresolved-only envelope 24-64; unresolved weight 40%. Ranks: commercial 34, training 34, colo 39.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Connecticut (CT) | overall rank 40/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
78/100; benefit 100; policy 25	18.71 / 22.57 cents	$147.51m	$-77.42m	52	$14,400

Equipment, electricity and property relief in baseline. Host agreement and capital thresholds; 2026 restriction/repeal proposals. Current intake and final legislation unresolved.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Host agreement, grid charges and neighborhood siting are decisive; a broad tax package cannot compensate for high benchmark electricity costs.

Overall: 42/100; unresolved-only envelope 22-62; unresolved weight 40%. Ranks: commercial 39, training 40, colo 38.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Delaware (DE) | overall rank 43/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	11.74 / 13.93 cents	$92.56m	$-22.47m	19	$9,550

No statewide sales tax. General business credits may apply; gross-receipts and local property burdens remain separate.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify PJM utility path, parcel drainage and northern-corridor network fit; no sales tax alone is insufficient.

Overall: 39/100; unresolved-only envelope 14-64; unresolved weight 50%. Ranks: commercial 42, training 38, colo 43.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Florida (FL) | overall rank 18/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	9.22 / 11.86 cents	$72.69m	$-2.60m	111	$8,700

Qualifying equipment and electricity exemption. At least 100 MW critical IT load and $150m investment; not automatically available to a small first phase.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Distinguish Miami international connectivity from bulk training economics; test hurricane/flood hardening and 100-MW IT eligibility.

Overall: 54/100; unresolved-only envelope 29-79; unresolved weight 50%. Ranks: commercial 13, training 27, colo 12.

Incentive evidence: https://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&URL=0200-0299/0212/Sections/0212.08.html

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Georgia (GA) | overall rank 7/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
50/100; benefit 60; policy 25	7.62 / 11.52 cents	$60.08m	$10.01m	276	$4,720

Equipment sales/use-tax exemption. County population drives capital and jobs tests. Repeal/off-ramp proposals create uncertainty; proposals are not treated as enacted.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Separate Atlanta network advantage from congested utility delivery and county approval; current incentive politics need refresh.

Overall: 61/100; unresolved-only envelope 41-81; unresolved weight 40%. Ranks: commercial 8, training 14, colo 2.

Incentive evidence: https://dor.georgia.gov/data-centers-sales-use-tax-exemption-aggregate-expenditures-county

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Hawaii (HI) | overall rank 49/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
15/100; benefit 0; policy 50	37.26 / 41.98 cents	$293.76m	$-223.67m	8	UNKNOWN

No dedicated statewide DC incentive identified. Hawaii general excise tax is a separate issue; do not assume a sales-tax-free jurisdiction.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test island-specific grid, fuel and submarine diversity; most mainland hyperscale comparisons are poor substitutes for island edge needs.

Overall: 28/100; unresolved-only envelope 1-56; unresolved weight 55%. Ranks: commercial 49, training 49, colo 48.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Idaho (ID) | overall rank 23/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
66/100; benefit 80; policy 35	7.90 / 9.57 cents	$62.28m	$7.81m	27	$4,580

Server-equipment exemption and linked property treatment. Capital/jobs and facility tests; 2026 eligibility changes proposed. Primary refresh remains necessary.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Verify specific utility, water, transmission and carrier routes; low prices cannot establish spare hydroelectric delivery.

Overall: 52/100; unresolved-only envelope 32-72; unresolved weight 40%. Ranks: commercial 14, training 17, colo 34.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Illinois (IL) | overall rank 38/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
3/100; benefit 0; policy 10	9.96 / 13.70 cents	$78.52m	$-8.44m	242	$8,930

New incentive applications no longer processed. DCEO confirms pause effective July 1, 2026. Existing certified projects require separate analysis.

Evidence: Primary confirms intake pause. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Chicago ecosystem remains useful despite incentive intake pause; distinguish northern PJM and southern MISO service territories.

Overall: 42/100; unresolved-only envelope 22-62; unresolved weight 40%. Ranks: commercial 38, training 43, colo 33.

Incentive evidence: https://dceo.illinois.gov/expandrelocate/incentives/datacenters.html

Policy evidence/watch: https://gov-pritzker-newsroom.prezly.com/gov-pritzker-pauses-new-data-center-tax-incentives

Indiana (IN) | overall rank 11/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
85/100; benefit 100; policy 50	9.15 / 14.06 cents	$72.14m	$-2.05m	125	$8,850

Equipment/electricity exemption plus optional local property relief. County-dependent capital thresholds; long exemption periods; discretionary property relief is not automatic.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Check utility territory and actual collateral/minimum-bill terms; prove local acceptance despite state incentive eligibility.

Overall: 57/100; unresolved-only envelope 32-82; unresolved weight 50%. Ranks: commercial 16, training 21, colo 5.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Iowa (IA) | overall rank 2/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
80/100; benefit 100; policy 35	6.94 / 10.89 cents	$54.71m	$15.37m	116	$9,790

Equipment/electricity relief; computer property treatment. 2025 changes limit new electricity benefits; investment/jobs and backup/design conditions. Avoid legacy indefinite exemption assumptions.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Validate energization timing and competing campuses; farmland values are high relative to many rural states.

Overall: 63/100; unresolved-only envelope 43-83; unresolved weight 40%. Ranks: commercial 6, training 5, colo 4.

Incentive evidence: https://www.legis.iowa.gov/docs/code/423.3.pdf

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Kansas (KS) | overall rank 21/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	8.26 / 11.61 cents	$65.12m	$4.97m	39	$3,100

Equipment and development-cost exemption. 2025 program; $250m capital, jobs test and 10-year electricity agreement; electricity itself excluded.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify SPP/utility delivery, firming and physically diverse fiber; include long energy-purchase commitments in exit terms.

Overall: 52/100; unresolved-only envelope 27-77; unresolved weight 50%. Ranks: commercial 17, training 20, colo 25.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Kentucky (KY) | overall rank 12/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	7.50 / 12.89 cents	$59.13m	$10.96m	56	$5,480

Equipment sales/use-tax relief. Population-dependent capital thresholds; up to 25/50-year terms by scope; electricity and building materials excluded from equipment definition.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Identify utility/RTO geography; test river flooding, mine/karst conditions and actual connectivity.

Overall: 57/100; unresolved-only envelope 32-82; unresolved weight 50%. Ranks: commercial 24, training 13, colo 15.

Incentive evidence: https://apps.legislature.ky.gov/law/statutes/statute.aspx?id=56356

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Louisiana (LA) | overall rank 15/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	6.75 / 12.07 cents	$53.22m	$16.87m	23	$3,850

State and local equipment sales/use relief. Certification and capital/payroll conditions; equipment scope matters. No electricity exemption credited here.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Separate inland and coastal hazards; test flood elevation, firm gas/utility delivery and water permits.

Overall: 56/100; unresolved-only envelope 31-81; unresolved weight 50%. Ranks: commercial 29, training 7, colo 29.

Incentive evidence: https://www.legis.la.gov/legis/Law.aspx?d=1186787

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Maine (ME) | overall rank 48/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
3/100; benefit 0; policy 10	15.91 / 23.35 cents	$125.43m	$-55.35m	11	$3,350

No dedicated DC incentive credited. Governor vetoed proposed statewide construction freeze in April; signed restrictions on general incentives. Do not label vetoed freeze operative.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Verify current policy after veto and incentive restrictions; test transmission, carrier redundancy and winter construction.

Overall: 30/100; unresolved-only envelope 10-50; unresolved weight 40%. Ranks: commercial 48, training 48, colo 47.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.reuters.com/legal/litigation/maine-governor-rejects-first-us-state-freeze-new-data-centers-2026-04-24/

Maryland (MD) | overall rank 37/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
64/100; benefit 80; policy 25	15.10 / 17.12 cents	$119.05m	$-48.96m	58	$9,750

Equipment exemption; optional local property relief. Investment/jobs and certification; electricity excluded. 2026 repeal proposals unresolved; local abatement requires approval.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Northern Virginia proximity does not confer its infrastructure; verify PJM delivery and local planning/air approvals.

Overall: 43/100; unresolved-only envelope 23-63; unresolved weight 40%. Ranks: commercial 37, training 39, colo 36.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Massachusetts (MA) | overall rank 42/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	19.94 / 24.79 cents	$157.21m	$-87.12m	40	$14,900

Equipment/construction and electricity relief in baseline. Large capital/jobs and clean-energy requirements; verify current certification and qualifying use.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Boston latency-sensitive uses differ from bulk AI training; high electricity and land proxies require a workload-specific premium.

Overall: 40/100; unresolved-only envelope 15-65; unresolved weight 50%. Ranks: commercial 44, training 42, colo 42.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Michigan (MI) | overall rank 33/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
50/100; benefit 60; policy 25	9.24 / 15.58 cents	$72.85m	$-2.76m	79	$6,800

Qualified DC equipment sales/use exemption. Enterprise and colocation programs differ; verify applicable capital/jobs/energy rules and 2026 reform status.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Water abundance does not establish withdrawal rights; distinguish utility service and prove local approvals, routes and brownfield liabilities.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 36, training 30, colo 23.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Minnesota (MN) | overall rank 31/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
52/100; benefit 60; policy 35	9.64 / 12.27 cents	$76.00m	$-5.91m	81	$6,790

Equipment/software refunds; large-scale power benefit excluded. Large-scale capital threshold $250m/60 months; prevailing wage and sustainable-design certification; no universal electricity exemption assumed.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Test actual large-load contract and post-2025 tax/fee rules; cold weather improves some cooling cases but adds winterization requirements.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 22, training 31, colo 21.

Incentive evidence: https://www.revisor.mn.gov/statutes/cite/297a.68

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Mississippi (MS) | overall rank 16/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	7.66 / 14.20 cents	$60.39m	$9.70m	25	$3,580

Equipment relief; local property and other tax programs. MDA and local approval; exact program, capital, jobs and stacking rules require confirmation.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify territory-specific utility expansion and inland hazard profile; public projects do not demonstrate interest in the offered parcel.

Overall: 56/100; unresolved-only envelope 31-81; unresolved weight 50%. Ranks: commercial 33, training 11, colo 22.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Missouri (MO) | overall rank 13/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	8.39 / 10.56 cents	$66.15m	$3.94m	95	$5,000

Equipment, construction and utility tax exemption. New facility $25m/36 months, 10 jobs at 150% county wage; 15-year term; net-fiscal-benefit limit and approval.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test utility/RTO borders, power date and local approvals; general regional affordability is not a seller option quote.

Overall: 57/100; unresolved-only envelope 32-82; unresolved weight 50%. Ranks: commercial 5, training 19, colo 10.

Incentive evidence: https://revisor.mo.gov/main/OneSection.aspx?section=144.810

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Montana (MT) | overall rank 6/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	6.67 / 12.67 cents	$52.59m	$17.50m	30	$1,230

No state sales tax; qualifying property classification. Special DC property treatment requires facility qualifications; use taxable-value classification, not a guessed effective millage bill.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test transmission and long fiber laterals; low industrial average may reflect existing customer mix unavailable to new DC loads.

Overall: 61/100; unresolved-only envelope 36-86; unresolved weight 50%. Ranks: commercial 19, training 2, colo 13.

Incentive evidence: https://mca.legmt.gov/bills/mca/title_0150/chapter_0060/part_0010/section_0620/0150-0060-0010-0620.html

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Nebraska (NE) | overall rank 26/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	8.35 / 8.86 cents	$65.83m	$4.26m	37	$4,250

Qualifying tangible property sales-tax exemption. Statutory incorporated-property scope; other investment programs require separate qualification.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Public power territory and project-specific terms matter; confirm ramp, water and physically separate network paths.

Overall: 51/100; unresolved-only envelope 26-76; unresolved weight 50%. Ranks: commercial 12, training 24, colo 32.

Incentive evidence: https://www.nebraskalegislature.gov/laws/statutes.php?statute=77-2704.62

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Nevada (NV) | overall rank 3/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
85/100; benefit 100; policy 50	8.09 / 9.19 cents	$63.78m	$6.31m	76	$1,200

Sales/use reduction and personal-property abatement. Conditional program; application, jobs, capital and resident-workforce tests. Not a blanket zero-tax regime.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Distinguish Reno and Las Vegas; prove water/cooling design, utility timing and abatement eligibility.

Overall: 62/100; unresolved-only envelope 37-87; unresolved weight 50%. Ranks: commercial 1, training 6, colo 3.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

New Hampshire (NH) | overall rank 45/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
52/100; benefit 60; policy 35	18.22 / 21.61 cents	$143.65m	$-73.56m	10	$6,500

No statewide sales tax. 2026 dedicated proposal failed committee per April survey; property/energy costs still matter.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: No sales tax does not offset every power-price disadvantage; test regional demand and utility extension costs.

Overall: 35/100; unresolved-only envelope 15-55; unresolved weight 40%. Ranks: commercial 46, training 44, colo 45.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

New Jersey (NJ) | overall rank 39/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
52/100; benefit 60; policy 35	15.10 / 17.52 cents	$119.05m	$-48.96m	66	$16,600

AI-focused investment tax-credit program. Next New Jersey is selective and capped; not a general equipment-tax exemption for every DC; labor conditions require review.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Peering/customer proximity can justify higher costs for some workloads; test selective AI-credit eligibility and local land constraints.

Overall: 42/100; unresolved-only envelope 22-62; unresolved weight 40%. Ranks: commercial 40, training 41, colo 37.

Incentive evidence: https://www.njeda.gov/wp-content/uploads/2024/09/S3432-Next-New-Jersey-AI-Data-Centers-Bill-signed-by-Gov-July-25th-2024.pdf

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

New Mexico (NM) | overall rank 20/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
15/100; benefit 0; policy 50	5.41 / 10.51 cents	$42.65m	$27.44m	22	$725

No dedicated statewide DC incentive in baseline. Local industrial-revenue-bond arrangements may matter; no negotiated package assumed for an unidentified parcel.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Lowest industrial benchmark is not a hyperscale quote; test utility/customer mix, water, carrier laterals and named buyer demand.

Overall: 53/100; unresolved-only envelope 28-78; unresolved weight 50%. Ranks: commercial 27, training 8, colo 40.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

New York (NY) | overall rank 32/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
45/100; benefit 60; policy 10	10.14 / 22.66 cents	$79.94m	$-9.86m	135	$4,300

Qualified equipment sales/use exemption. September reporting indicates major siting restrictions and proposed community payments; primary order/scope still unresolved. Proposal not priced as law.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Separate upstate and downstate costs/network needs; resolve current siting orders and scope before selecting a project.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 35, training 33, colo 26. REGULATORY HOLD: score capped at 50 until current operative scope is verified.

Incentive evidence: https://www.nysenate.gov/legislation/laws/TAX/1115

Policy evidence/watch: https://www.reuters.com/business/retail-consumer/new-york-proposes-1-million-per-megawatt-community-investment-data-centers-2026-09-15/

North Carolina (NC) | overall rank 8/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	7.82 / 10.55 cents	$61.65m	$8.44m	97	$5,470

Qualifying equipment and electricity tax relief. Different qualifying/eligible internet DC provisions; capital, wage and use tests must match the applicant.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Check utility pipeline, backup permits and local land use; coastal versus inland hazard conditions differ materially.

Overall: 61/100; unresolved-only envelope 36-86; unresolved weight 50%. Ranks: commercial 4, training 10, colo 6.

Incentive evidence: https://www.ncleg.net/enactedlegislation/statutes/html/bysection/chapter_105/gs_105-164.13.html

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

North Dakota (ND) | overall rank 24/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	8.18 / 7.58 cents	$64.49m	$5.60m	23	$2,360

Qualified computer equipment sales/use exemption. Facility-size and equipment/use tests; energy tax treatment not assumed exempt.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify actual tariff: commercial average is below industrial here; cold climate, sparse routes and construction logistics need joint modeling.

Overall: 52/100; unresolved-only envelope 27-77; unresolved weight 50%. Ranks: commercial 7, training 18, colo 35.

Incentive evidence: https://ndlegis.gov/cencode/t57c39-2.pdf

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Ohio (OH) | overall rank 30/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
50/100; benefit 60; policy 25	10.21 / 13.78 cents	$80.50m	$-10.41m	240	$9,350

Negotiated equipment sales/use-tax exemption. Tax Credit Authority agreement; at least $1.5m annual compensation from month 25; utility and local approval terms separate.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Strong listed ecosystem does not establish spare capacity; check utility-specific minimum bills, guarantees and local litigation.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 25, training 35, colo 14.

Incentive evidence: https://codes.ohio.gov/ohio-revised-code/section-122.175

Policy evidence/watch: https://www.ideastream.org/environment-energy/2026-09-03/stark-county-residents-sue-township-trustees-alleging-lack-of-transparency-in-data-center-project

Oklahoma (OK) | overall rank 1/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
80/100; benefit 100; policy 35	6.44 / 8.81 cents	$50.77m	$19.32m	48	$2,540

Equipment/qualifying electricity and property incentives. NAICS/use-specific exemptions and five-year property program; 2026 moratorium debate is a watch item, not an enacted ban here.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Low benchmark and tax breadth warrant research; resolve local opposition, storm design, utility dates and buyer-compatible curtailment.

Overall: 64/100; unresolved-only envelope 44-84; unresolved weight 40%. Ranks: commercial 3, training 1, colo 8.

Incentive evidence: https://www.okcommerce.gov/doing-business/business-relocation-expansion/incentives/

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Oregon (OR) | overall rank 5/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	8.24 / 10.57 cents	$64.96m	$5.12m	135	$3,780

No sales tax; location-specific enterprise-zone property relief. Enterprise-zone eligibility and local agreements must be proved; statewide absence of sales tax does not waive property tax.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Distinguish Portland and eastern campuses; prove utility access, enterprise-zone agreement, seismic and wildfire exposure.

Overall: 61/100; unresolved-only envelope 36-86; unresolved weight 50%. Ranks: commercial 2, training 15, colo 1.

Pennsylvania (PA) | overall rank 34/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
50/100; benefit 60; policy 25	10.91 / 13.99 cents	$86.01m	$-15.93m	174	$8,490

Qualified DC equipment sales/use exemption. Utilities excluded; labor/repeal proposals and local approvals unresolved; verify current law and qualification.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Gas supply nearby does not provide permitted onsite power; verify PJM delivery, local votes, terrain and carrier paths.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 28, training 36, colo 16.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Rhode Island (RI) | overall rank 50/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
10/100; benefit 0; policy 35	21.68 / 23.80 cents	$170.93m	$-100.84m	7	$22,500

No dedicated DC incentive in April baseline. 2026 proposal noted; no unverified new benefit credited.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Small footprint and high electricity cost favor specific local/edge needs over a generic bulk-compute thesis.

Overall: 25/100; unresolved-only envelope 5-45; unresolved weight 40%. Ranks: commercial 50, training 50, colo 50.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

South Carolina (SC) | overall rank 17/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
66/100; benefit 80; policy 35	7.85 / 11.93 cents	$61.89m	$8.20m	48	$4,740

Equipment and electricity sales/use exemption. Capital, jobs and wage requirements; application/sunset timing needs confirmation; moratorium proposals are not treated as enacted.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Test utility territory, water rights and coastal/inland differences; verify incentive application timing.

Overall: 54/100; unresolved-only envelope 34-74; unresolved weight 40%. Ranks: commercial 21, training 16, colo 19.

Incentive evidence: https://www.scstatehouse.gov/code/t12c036.php

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

South Dakota (SD) | overall rank 44/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
10/100; benefit 0; policy 35	9.38 / 11.55 cents	$73.95m	$-3.86m	10	$2,970

No dedicated DC incentive in April baseline. 2026 proposal failed committee per April survey; local regulation and utility arrangements remain open.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Prove buyer workload and carrier diversity; sparse directory presence is not proof of low competition or cheap available capacity.

Overall: 37/100; unresolved-only envelope 17-57; unresolved weight 40%. Ranks: commercial 41, training 37, colo 46.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Tennessee (TN) | overall rank 4/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	6.77 / 13.70 cents	$53.37m	$16.71m	65	$6,150

Equipment exemption and reduced electricity tax. Capital, jobs and wage tests; electricity benefit is a reduced rate, not blanket exemption.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Low industrial average differs sharply from commercial average; TVA/local utility billing eligibility is a decisive next question.

Overall: 61/100; unresolved-only envelope 36-86; unresolved weight 50%. Ranks: commercial 20, training 4, colo 9.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Texas (TX) | overall rank 28/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
59/100; benefit 80; policy 10	6.65 / 8.57 cents	$52.43m	$17.66m	537	$2,970

Equipment and electricity sales-tax relief. Standard program: $200m/$250m, 20 jobs, 10/15 years, state tax only. Separate large-project program; September regulatory escalation.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Separate ERCOT from non-ERCOT areas; resolve current connection restrictions, water disclosures and study/curtailment obligations.

Overall: 50/100; unresolved-only envelope 30-70; unresolved weight 40%. Ranks: commercial 26, training 28, colo 27. REGULATORY HOLD: score capped at 50 until current operative scope is verified.

Incentive evidence: https://comptroller.texas.gov/taxes/data-centers/

Policy evidence/watch: https://www.reuters.com/legal/litigation/texas-moves-penalize-data-centers-water-violations-2026-09-14/

Utah (UT) | overall rank 22/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	8.49 / 10.28 cents	$66.94m	$3.15m	48	$3,500

Qualified equipment sales/use exemption. Size/use and ownership tests; electricity not credited; verify current statutory section and certification.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Verify utility delivery, water/cooling design and carrier access; cheap statewide land does not measure Wasatch Front powered land.

Overall: 52/100; unresolved-only envelope 27-77; unresolved weight 50%. Ranks: commercial 9, training 22, colo 20.

Incentive evidence: https://le.utah.gov/xcode/Title59/Chapter12/59-12-S104.html

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Vermont (VT) | overall rank 47/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
10/100; benefit 0; policy 35	12.91 / 20.97 cents	$101.78m	$-31.69m	3	$4,400

No dedicated statewide DC incentive identified. Moratorium proposals appeared in 2026; current disposition unresolved. No statewide ban assumed.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Verify network, power procurement and current proposals; cold climate alone does not create a hyperscale market.

Overall: 30/100; unresolved-only envelope 10-50; unresolved weight 40%. Ranks: commercial 47, training 47, colo 49.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Virginia (VA) | overall rank 27/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
45/100; benefit 60; policy 10	10.08 / 11.11 cents	$79.47m	$-9.38m	674	$6,100

Qualified equipment sales/use exemption. Capital/jobs/wage and agreement requirements; September accountability framework includes proposals requiring legislation.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Largest listed ecosystem; test exact delivery date, local approvals, noise and policy transition; incumbent campuses are competing substitutes.

Overall: 50/100; unresolved-only envelope 30-70; unresolved weight 40%. Ranks: commercial 10, training 32, colo 11.

Incentive evidence: https://law.lis.virginia.gov/vacode/title58.1/chapter6/section58.1-609.3/

Policy evidence/watch: https://www.reuters.com/world/us/virginia-tightens-data-center-restrictions-amid-political-backlash-2026-09-18/

Washington (WA) | overall rank 9/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
50/100; benefit 60; policy 25	7.09 / 11.88 cents	$55.90m	$14.19m	117	$3,710

Qualified server and power-infrastructure relief. Rural/urban/refurbishment distinctions, employment and sustainable-design conditions; 2026 off-ramp proposals require refresh.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Separate Seattle and eastern public-utility districts; cheap historical hydro does not establish new-load allocation.

Overall: 60/100; unresolved-only envelope 40-80; unresolved weight 40%. Ranks: commercial 15, training 9, colo 7.

Incentive evidence: https://app.leg.wa.gov/rcw/default.aspx?cite=82.08.986

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

West Virginia (WV) | overall rank 29/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
71/100; benefit 80; policy 50	8.57 / 11.68 cents	$67.57m	$2.52m	10	$3,520

Equipment exemption and special property valuation. Coal-use conditions may conflict with buyer carbon requirements; special microgrid pathway does not prove power rights or local acceptance.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Test terrain/net acreage, fiber, retired-site liabilities and buyer carbon policy; no inferred load rights from generation retirement.

Overall: 48/100; unresolved-only envelope 23-73; unresolved weight 50%. Ranks: commercial 23, training 25, colo 41.

Incentive evidence: https://code.wvlegislature.gov/11-6N-1/

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Wisconsin (WI) | overall rank 35/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
52/100; benefit 60; policy 35	9.18 / 13.60 cents	$72.38m	$-2.29m	53	$6,420

Qualified construction/equipment exemption. County population-based investment tests; proposed design conditions and local referenda require project-specific checks.

Evidence: April 2026 NCSL baseline only; primary/current refresh required. Policy: Adverse/reform watch: status and scope described in conditions; local acceptance unresolved.

Next diligence: Verify actual utility and local referendum/approval path; do not extrapolate one approved campus to another municipality.

Overall: 48/100; unresolved-only envelope 28-68; unresolved weight 40%. Ranks: commercial 32, training 29, colo 31.

Incentive evidence: https://www.ncsl.org/fiscal/subsidizing-servers-how-states-are-competing-to-attract-data-centers

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

Wyoming (WY) | overall rank 25/50

Policy-adjusted incentives	Industrial / commercial	Annual industrial cost	Savings vs U.S.	Listed facilities	Farm value/acre
57/100; benefit 60; policy 50	8.81 / 9.66 cents	$69.46m	$0.63m	31	$1,000

Qualifying computer equipment sales/use exemption. Investment and jobs tests; power equipment relief tied to higher investment threshold; no automatic electricity-tax exemption.

Evidence: Primary program/statute reviewed; September legal completeness not certified. Policy: Unresolved: 50 is a neutral placeholder, NOT evidence of low risk.

Next diligence: Distinguish Cheyenne network access from remote land; validate wind firming, utility delivery, water and workforce logistics.

Overall: 51/100; unresolved-only envelope 26-76; unresolved weight 50%. Ranks: commercial 11, training 26, colo 30.

Incentive evidence: https://wyoleg.gov/statutes/compress/title39.pdf

Policy evidence/watch: https://www.ncsl.org/state-legislatures-news/details/artmid/1052/articleid/5162

All 52 project factors remain active

The pilot weights below are from the project policy. They are not the state-screen weights. Every paid-control gate remains UNKNOWN; state proxies do not meet exact-scope proof requirements.

Factor	Policy factor	Pilot points	First gate	What this atlas establishes
P01	Exact serving utility and load process	3	G1	Not established by state data; exact-site/buyer evidence required.
P02	Studyable delivery path and headroom	4	G2	Not established by state data; exact-site/buyer evidence required.
P03	Phased energization and load ramp	3	G2	Not established by state data; exact-site/buyer evidence required.
P04	Energy supply and firming	2	G2	Not established by state data; exact-site/buyer evidence required.
P05	Electrical resilience and power quality	2	G2	Not established by state data; exact-site/buyer evidence required.
P06	Forward grid competition and congestion	3	G2	Not established by state data; exact-site/buyer evidence required.
P07	Delivered tariff and credit obligations	3	G2	EIA sector benchmark only; tariff, collateral and minimum bills UNKNOWN.
P08	Onsite or bridge power feasibility	2	G2	Not established by state data; exact-site/buyer evidence required.
P09	Flexible load and curtailment compatibility	1	G2	Not established by state data; exact-site/buyer evidence required.
P10	Offsite power works and equipment path	2	G2	Not established by state data; exact-site/buyer evidence required.
B01	Workload, geography and network boundary	3	G1	Not established by state data; exact-site/buyer evidence required.
B02	Revealed demand with timing	3	G1	Directory ecosystem proxy only; funded and dated local demand UNKNOWN.
B03	Substitutes and competitive pipeline	2	G2	Directory counts are context only; comparable offered alternatives UNKNOWN.
B04	Buyer and sponsor funding capability	2	G2	Not established by state data; exact-site/buyer evidence required.
B05	Reachable acquisition decision function	1	G2	Not established by state data; exact-site/buyer evidence required.
B06	Defensible reason to pay Syncranicity	1	G2	Not established by state data; exact-site/buyer evidence required.
F01	Physical route and entry diversity	4	G2	Not established by state data; exact-site/buyer evidence required.
F02	End-to-end network performance	3	G1	Not established by state data; exact-site/buyer evidence required.
F03	Carrier serviceability and capacity	2	G2	Not established by state data; exact-site/buyer evidence required.
F04	Fiber construction, rights and delivery	2	G2	Not established by state data; exact-site/buyer evidence required.
F05	Network ecosystem and expansion	1	G2	Directory ecosystem proxy only; on-ramps and routes UNKNOWN.

Factor	Policy factor	Pilot points	First gate	What this atlas establishes
L01	Parcel identity, seller and title	2	G1	Not established by state data; exact-site/buyer evidence required.
L02	Net contiguous developable layout	4	G2	Not established by state data; exact-site/buyer evidence required.
L03	Legal access, easements and crossings	2	G2	Not established by state data; exact-site/buyer evidence required.
L04	Assignable conditional control	2	G3	Not established by state data; exact-site/buyer evidence required.
L05	Expansion and assembly	2	G2	Not established by state data; exact-site/buyer evidence required.
J01	Exact use permission and overlays	3	G1	Not established by state data; exact-site/buyer evidence required.
J02	Approvals and appeal critical path	2	G2	Not established by state data; exact-site/buyer evidence required.
J03	Government and community evidence	2	G1	State policy watch only; independent local support UNKNOWN.
J04	Environmental and operating permits	2	G2	Not established by state data; exact-site/buyer evidence required.
J05	Ratepayer, water and local benefit burden	1	G2	State risk notes only; cost allocation and impacts UNKNOWN.
J06	Transaction and regulatory applicability	2	G3	Not established by state data; exact-site/buyer evidence required.
E01	Floodway, flood and drainage	2	G1	Not established by state data; exact-site/buyer evidence required.
E02	Wetlands, habitat and cultural resources	2	G2	Not established by state data; exact-site/buyer evidence required.
E03	Slope, soils and ground stability	2	G2	Not established by state data; exact-site/buyer evidence required.
E04	Contamination and prior use	1	G2	Not established by state data; exact-site/buyer evidence required.
E05	Adjacent hazards and physical security	1	G2	Not established by state data; exact-site/buyer evidence required.
W01	Lawful water source and rights	2	G2	Not established by state data; exact-site/buyer evidence required.
W02	Physical supply and drought resilience	1	G2	Not established by state data; exact-site/buyer evidence required.
W03	Cooling architecture and heat rejection	2	G2	Not established by state data; exact-site/buyer evidence required.
W04	Wastewater, fire flow and water works	1	G2	Not established by state data; exact-site/buyer evidence required.
W05	Climate, PUE and WUE scenario	1	G2	Not established by state data; exact-site/buyer evidence required.
C01	All-in buyer TCO and residual value	2	G2	Illustrative energy cost only; full TCO UNKNOWN.
C02	Option runway and capital at risk	2	G3	Not established by state data; exact-site/buyer evidence required.
C03	Transferable evidence value	1	G3	Not established by state data; exact-site/buyer evidence required.
C04	Alternate-use and walk-away downside	1	G2	USDA farm value proxy only; alternate-use parcel value UNKNOWN.

Factor	Policy factor	Pilot points	First gate	What this atlas establishes
C05	Net incentive value and durability	1	G2	Program breadth screen only; project eligibility and net NPV UNKNOWN.
S01	Renewable procurement compatibility	1	G2	Not established by state data; exact-site/buyer evidence required.
S02	Carbon, sustainability and reporting	1	G2	Not established by state data; exact-site/buyer evidence required.
S03	Future technology and exit adaptability	1	G2	Not established by state data; exact-site/buyer evidence required.
X01	Workforce, logistics and supply chain	1	G2	Not established by state data; exact-site/buyer evidence required.
X02	Execution ownership and quality control	1	G3	Not established by state data; exact-site/buyer evidence required.

All 34 pre-option topics remain active

Topic	Project topic	State-map treatment
Q01	Exact parcel	Screening context only; retain full desktop-first verification and residual-call workflow.
Q02	Seller ownership and authority	Screening context only; retain full desktop-first verification and residual-call workflow.

Q19	Competing alternatives	Screening context only; retain full desktop-first verification and residual-call workflow.
Q20	Named funded takeout	Screening context only; retain full desktop-first verification and residual-call workflow.
Q21	Seller commercial terms	Screening context only; retain full desktop-first verification and residual-call workflow.
Q22	Assignable conditional control	Screening context only; retain full desktop-first verification and residual-call workflow.
Q23	Lawful transaction and marketing	Screening context only; retain full desktop-first verification and residual-call workflow.

Topic	Project topic	State-map treatment
Q24	Transferable evidence and reliance	Screening context only; retain full desktop-first verification and residual-call workflow.
Q25	Option cash and runway	Screening context only; retain full desktop-first verification and residual-call workflow.
Q26	All-in buyer economics	Screening context only; retain full desktop-first verification and residual-call workflow.
Q27	Alternate use and walk-away downside	Screening context only; retain full desktop-first verification and residual-call workflow.
Q28	Incentives and tax exposure	Screening context only; retain full desktop-first verification and residual-call workflow.
Q29	Energy and sustainability fit	Screening context only; retain full desktop-first verification and residual-call workflow.
Q30	Onsite or bridge generation	Screening context only; retain full desktop-first verification and residual-call workflow.
Q31	Workforce, construction and logistics	Screening context only; retain full desktop-first verification and residual-call workflow.
Q32	Why the buyer pays Syncranicity	Screening context only; retain full desktop-first verification and residual-call workflow.
Q33	Independent red-team review	Screening context only; retain full desktop-first verification and residual-call workflow.
Q34	Final founder authorization	Screening context only; retain full desktop-first verification and residual-call workflow.

16 non-compensating paid-control requirements

Requirement	Result from state maps
Exact parcel	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Seller authority	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Legal access and layout	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Serving utility	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Studyable power path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Use and approval path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Water/cooling path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Fiber path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Environmental path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Buyer fit	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Funded takeout path	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Assignable control	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Lawful transaction	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Transferable evidence	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Capital and runway	UNKNOWN - current exact-parcel / buyer / issuer evidence required.
Independent red team	UNKNOWN - current exact-parcel / buyer / issuer evidence required.

The project's conservative score >=70 and evidence confidence >=85 apply only after the complete parcel framework has been populated. A state-screen score, percentile, or green color cannot be used for those thresholds. No automatic spending authority follows from either model.

Source register and access limits

Source links were reviewed on 20 September 2026. Some primary access attempts failed; those states explicitly retain the older NCSL baseline. The register records the sources actually used, not a claim of exhaustive local or legislative coverage. Secondary news watch items require primary scope confirmation before reliance. Source types and vintages matter more than the number of links.
